To Our Friends and Customers

We are with you again for another year with the same low prices and quality goods but in a new dress. We wish to thank our customers for the fine patronage of the past year and we hope we have satisfied your every want.

We are sending to you this year our new catalogue with the prices where you can find them. We think that we have anticipated your wants and that we are giving you a new, easily understood catalogue containing only those varieties of plants that we would personally plant ourselves.

Our slogan is the same: "Quality nursery stock to the public at the lowest possible prices." We are the pioneer mail-order nursery of this section and we set the standard for good stock and low prices. Do not be deceived by prices quoted by smaller nurserymen and dealers who continue in business by furnishing you with inferior stock.

We, besides reducing our prices on a large number of items, are continuing our remarkable premium offer. If you have not seen any of our premiums, ask your friends if they are not fine and just as we represent them. This premium offer is our method of letting you share our profits.

We consider your good will our strongest asset. This is our thirty-seventh year in business and we have grown and prospered because we have satisfied your wants. We will welcome your further business, and will try just as hard as ever to please you. Thanking you for your past patronage, and with kindest regards, we are

Gratefully yours,

W. F. SCHELL, President.

History

Mr. W. F. Schell, the president, came to Wichita in 1890 from Caldwell to form the Wichita Nurseries Association. In association with several of the most influential men of the town, Mr. Schell planted out several acres of nursery stock and from this small development our firm has through the years increased in acreage and business until we are rated as one of the largest and most complete nurseries in the middle west.

During the years 1915, 1917 and 1918, Mr. Schell was Commissioner of Parks, City of Wichita, and much of the credit for the excellent park system of Wichita goes to him as he was very active as Commissioner.

In 1925, we started a new nursery at Tulsa which is known as the Tulsa-Wichita Nurseries. This new nursery is now one of the best and most complete nurseries in Oklahoma. We have built new packing houses on the grounds of our Oklahoma Nursery.

We have equipped both of our nurseries with modern equipment and efficient workmen and we would welcome a chance to serve you with our quality plants.

Personnel

Mr. W. F. Schell, president of our firm, started as an apprentice in the nursery business for the Brackett Nursery Company, fifty-nine years ago. Mr. Schell has continued actively in the nursery business since that time and is the oldest nurseryman in Kansas. Mr. Schell is acknowledged as one of the best orchard men in the state. His long experience in the growing of fruit trees and small fruits, and his additional experience of orchard work fits him as an orchard expert. Mr. Schell was Kansas Commissioner of Horticulture at the World's Fair in St. Louis in 1904 where his efficient and painstaking efforts won much reward and glory for the products of the Kansas orchards and winning two grand prizes for the State. He will assist you in starting your orchard and will be glad to advise you on your problems at any time. Is also a life member of the Kansas State Horticultural Society and a former vice-president as well as a member of the Luther Burbank Arboretum Association.

Mr. Albert L. Schell, our secretary and head of our Landscape Department, is a graduate of the Kansas State Agricultural College at Manhattan and also the possessor of a Master's Degree from the University of Chicago at Chicago, Illinois. Mr. Schell was in the landscape business in Chicago for six years before coming back to Wichita. Since his return to Wichita, Mr. Schell has been very busy with his landscape work, specializing upon the decoration of homes, cemeteries, subdivisions, parks, and industrial plants. Our friends and our customers should feel free to place their landscape problems in Mr. Schell's hands.

Mr. W. Robert Schell, our treasurer and Oklahoma manager, is a graduate of the Kansas State Agricultural College at Manhattan and also pursued a post-graduate course in Landscape Gardening at the University of Illinois. Mr. Schell resides in Tulsa, Oklahoma, where we have a new nursery in the making. Mr. Schell is not only an orchard specialist but one of the best landscape architects in this part of the country. His landscape development on large estates, cemeteries, parks and industrial plants is attracting the attention of numerous influential people of Oklahoma.

For nearly sixty years Mr. W. F. Schell has served you well. The above photo is how he looks today, on the job, as usual

Page of Information

GENERAL

Wichita is a center of a network of railroads which can serve you promptly and well. We have the Santa Fe, Rock Island, Frisco, Missouri Pacific, Orient, Midland Valley and Arkansas Valley Interurban roads. You will find the freight and express shipments on these roads of the best.

PACKING AND SHIPPING

Our large packing houses, finely equipped cellars and new equipment, place us in a position to protect and furnish to you the best of quality plants. We use every precaution to protect all plants so that they will reach you in fresh and growable condition. Our packers are all experienced men and our method of packing, so that your plants will keep fine and fresh, has caused us to receive many compliments from our customers.

SAFE DELIVERY GUARANTEED

We take every precaution to protect your nursery stock in transit. Any stock that is damaged in transit will be replaced free of charge, f. o. b. packing station. We receive accurate accounts daily of the weather conditions in your locality. We protect you by shipping at the right time—when the weather conditions are favorable at our nurseries and in your locality.

CERTIFICATE OF GENUINENESS

We exercise the greatest care in having our trees true to label. We agree, on proper proof, to replace all trees, plants, etc., that may be found untrue, free of charge or refund the amount paid for said stock but will not be liable further. Complaints, if any, must be made immediately after the delivery of the stock.

GUARANTEE OF GROWTH

We use the greatest care possible to furnish you with live, fresh dug, plants. Any plants that fail to leaf out the first spring following the planting will be replaced at one-half price, providing the proper proof is furnished. The customer agrees to pay transportation charges on these replaced plants.

FINANCIAL

Remittances must accompany the order. Remittances may be made by postal or express money order, personal check, bank draft, or stamps if your order is small. We will not be responsible for currency sent by mail.

REFERENCE

To new customers and people not knowing us, we refer you to the First National Bank of Wichita, Industrial State Bank of Wichita, Dun Company, Chamber of Commerce of Wichita, or any business house in this city.

PRICES

Prices quoted herein means that the specified stock will be packed free of charge and delivered in good condition to the transportation company. Our quality plants are priced low, so get your order in early while we have a surplus in all varieties.

HOW TO SHIP

Orders will be shipped freight, express or parcel post, as you indicate. If the orders are not too large we recommend express shipment as this service is prompt and satisfactory. Those desiring parcel post shipment, PLEASE ADD 10% TO THE AMOUNT OF THEIR ORDER FOR POSTAGE. If you have sent too much the balance will be returned and if you have not sent enough, we will write you for the balance. Remember, we do not pay transportation charges of any kind. Roses, shrubs, vines, perennials, bulbs, and 2 to 3-foot fruit trees may be sent parcel post.

HEALTH CERTIFICATE

The following health certificate accompanies all orders and guarantees to you healthy stock which is free from disease:

KANSAS ENTOMOLOGIST COMMISSION

Office of State Entomologist, University of Kansas

No. A 1531

LAWRENCE, JUNE 14, 1927.

CERTIFICATE OF NURSERY INSPECTION

THIS IS TO CERTIFY, That in accordance with Section 2-703 of the Revised Statutes of 1923, the nursery stock now growing for sale by Wichita Nurseries and Seed House, of Wichita, Kansas, has been inspected by a duly authorized inspector, and found apparently free from dangerously injurious insects or plant diseases.

H. B. HUNGERFORD, State Entomologist.

Invalid after June 1, 1928.

PREMIUMS

Orders of over \$10.00 are entitled to receive the nice premiums as listed in this catalogue, pages 22 to 25. If your order fails to reach this figure club the same with your neighbor and get your premium. We guarantee these premiums to be just as indicated and of fine quality. Those customers taking advantage of this fine premium offer are really getting a discount of from 10 to 15% off their bill. All premiums except nursery stock are shipped f. o. b. Kansas City, Mo.

SPECIAL RATES AND PRICES

Note at the bottom of each group of prices the special rate given for a number of plants of this group. For example, you can buy five pears at the 10 rate—that is one pear would cost you in the standard 3 to 4-foot size 50 cents, but you can buy five of these trees (in this size only) for only 45 cents each. If you want as many as 30 pears in this same grade you can buy them at the 100 rate or for 40 cents apiece. The same rate proposition is given at the foot of each group of prices. Write us if you do not understand this rate system. Customers may mix the varieties as much as they wish but must keep the one size.

LARGE ORDERS

Customers contemplating the purchase of plants in very large quantities kindly write in your list as we may have what you want in surplus and thus be able to quote you even lower than these prices.

LANDSCAPE DESIGNS

Those parties wanting us to furnish you with landscape sketches must send in your preliminary sketches and pictures of your home so as we will have a working background. Also you must deposit \$5.00 with us to cover cost of labor and materials. Upon the receipt of this \$5.00 we will issue you a credit memorandum good for \$5.00 worth of nursery stock which is good a year from the date of issue. Our landscape department is the best in the middle west and will gladly help you design your grounds properly.

SERVICE DEPARTMENT

Our service department is composed of experts in gardening, landscape designing, and orcharding. These men will gladly answer all correspondence free of charge and we trust that you will let us help you solve your problems.

TIME OF SHIPMENT

Kindly indicate the approximate time that you want your order shipped. We will ship your order as nearly as possible on the date that you indicate. You must remember that we are governed in this matter by weather conditions. To those that do not indicate the time of shipment, we will use our best judgment.

Fruit Tree Department

Our fruit trees have been the standard of quality for years. People from all parts of this section of the country have been buying our trees for this period. Our growers know how to produce these quality trees and we use the latest methods of growing. The carefully selected scions are budded or grafted on "whole roots," thus producing a strong, sturdy tree that will stand transplanting, grow and produce the maximum crops. Our growing methods are more expensive than the average nursery because we take more pains with the details of each process. Our trees, as we price them, cost you no more than the ordinary trees and are worth nearly twice as much.

We use the same care for digging and packing our trees that we use in growing them. We use every modern method for protecting the tree after it is dug up to the time that you receive the same. Our large warehouses and cellars afford us ample space for our men to grade and pack the trees. Trained men look after the stock in the warehouses and keep the same moist and in good condition. One of our hobbies is our good packing. We strive to pack every plant for shipment so that it will go a great distance safely, and even more we pack so that you may keep the bundle of trees in the bale or box a week after you receive them and they will still be in good shape for planting after this time. We have hundreds of testimonials each season complimenting us on our fine fruit trees. They not only grow, but they produce fine crops.

APPLE TREES

The most select stock grown anywhere, none better. We grade our plants strong and give good values for your money. We recommend in the summer apples the Early Harvest, Red June and Yellow Transparent. In the fall apples we recommend Maiden Blush, Wealthy, Grimes Golden, Jonathan. In the winter varieties we recommend the Delicious, Winesap, Stayman's Winesap and York Imperial.

2-year, 2 to 3 feet.....	
2-year, 3 to 4 feet, branched.....

.30	2.80	25.00
.50	4.50	40.00
.60	5.50	50.00

Yellow Transparent

Summer or Early Varieties

Early Harvest.—Medium to large, flat, pale yellow; good. Tree a fair grower and bearer. July.

Red June.—Medium size, red; flesh white, tender, juicy, sub-acid; an abundant bearer. July.

Yellow Transparent (Russian).—Skin clear white, changing to pale yellow when fully ripe; flesh white, tender, sprightly sub-acid; good early bearer. July.

Winesap

Autumn Varieties

Maiden Blush.—Large, flat, pale yellow; beautiful blush; mild, sub-acid; valuable for market, cooking and drying. September.

Wealthy.—Fruit medium, oblate, skin smooth, whitish-yellow, shaded with deep red in the sun, splashed and spotted in the shade. Flesh white, tender, juicy, sub-acid, very good. August to September.

Early Winter Varieties

Grimes.—Medium to large, roundish, oblate, slightly conical large specimens oblong. Skin yellowish-white, with a mild sub-acid, agreeably good to best flavor. September to December.

Jonathan.—Medium size, unless thinned on tree, when it becomes a fair size; form roundish, conical; skin thin and smooth, the ground clear, light yellow, nearly covered with lively red stripes and deepening into brilliant or dark red in the sun; flesh white, rarely a little pinkish; very tender and juicy; mild, sprightly vinous flavor. September to December.

Jonathan

Rome Beauty

Winter Varieties

Arkansas Black.—Large, very dark red, smooth, roundish flat, lightly dotted white; flesh yellow, sub-acid; long keeper. November to April.

Delicious.—This variety should be in every orchard. Fruit large, almost covered with beautiful dark red, blending to yellow at the blossom end. Sweet, pleasant flavor, only enough acid to make it pleasing. Flesh crisp, juicy, fine grained, melting. September to February.

Ben Davis.—Large, roundish, oblong, red striped, very handsome. Mild, sub-acid, not rich. Tree very vigorous, hardy and productive. This is one of the safest and most profitable market apples grown in this country at present. October to March.

Gano.—Tree very healthy, vigorous, hardy, having stood 32 degrees below zero without injury. A rapid grower, large and spreading in orchard. Color bright red without stripes or blotches. Similar but superior to Ben Davis. Large and even in size. Prolific bearer and a good keeper. October to March.

Rome Beauty.—Large, roundish flat; bright red, mild, sub-acid, very good. A good grower and early bearer. November to March.

Stayman Winesap.—Tree is a vigorous grower, drooping in habit and adapts itself to soils and situations; fruit large size, bright red color and produced in large quantities. A profitable market variety. October to March.

Winesap.—Medium, conical, dark red; very smooth. Acid to sub-acid, juicy and rich, very valuable for both family and market. Tree very hardy and an early and constant bearer December to April.

Yellow Bellflower.—Large to very large; oblong, pale yellow, sometimes blushed; acid to sub-acid, rich and good. Tree a fine spreading grower and hardy. October to January.

York Imperial.—Medium to large, oblate; color white, shaded with crimson; flesh firm, crisp, juicy and sub-acid; a good bearer and keeper; one of the best winter apples. November to April.

CRAB APPLE TREES

These fine fruit trees should be on every home lot. The fruits are tart, juicy, and are used exclusively for jelly, preserves and for canning. We recommend for all-around use the Hyslop, Transcendent and Whitney varieties.

Each	10	100
\$.50	\$4.75	\$40.00
.55	5.00	45.00
.70	6.50	60.00

Florence.—Originated in Minnesota. Fruit medium in size; color carmine when well colored; flesh yellowish, fine, acid. Excellent for cooking and for jelly. Valuable for early market. Tree hardy and spreading; bears when young and inclined to overbear.

Transcendent.—Medium size; flavor pleasant and agreeable; extremely hardy.

Hyslop.—Large size, beautiful dark crimson. Hangs in clusters. September.

Whitney.—Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, splashed with carmine; flesh firm, juicy and rich. Very hardy, vigorous, handsome.

PEACH TREES

We make a specialty of selecting scions from trees that have been producing maximum crops. We promote a strong root development in the peach by use of fertilizers. Also all your trees are kept properly pruned in the nursery rows. We recommend in the freestone class, Elberta, Champion, J. H. Hale, Crawford's Early and Late, Mayflower, Stump and Early Wheeler. In the clings, we recommend the Heath Cling, Chinese Cling and Indian Blood Cling.

	Each	10	100
2 to 3 feet, branched.....	\$.20	\$1.70	\$15.00
3 to 4 feet, branched.....	.26	2.40	20.00
4 to 5 feet, choice.....	.40	3.70	30.00
5 to 6 feet, select.....	.50	4.50	38.00
5 at 10 rates; 30 at 100 rates.			

Peach trees are in exceedingly heavy demand and stock is limited. Place your order early while our stock is complete.

VARIETIES

Early Wheeler (Red Bird Cling).—Fruit larger than Greensboro, round, flesh white, juicy; tough skin nearly covered with deep red. A good shipper. July 1st to 5th.

Mayflower.—Originated in North Carolina; very early; color perfectly red; a valuable market sort. Perfectly hardy in bud and a heavy cropper. July 5th to 10th.

Carman.—Large, resembles Elberta in shape; color creamy white, with deep blush; skin very tough; flesh tender, fine flavor and quite juicy. One of the hardiest in bud. In shipping qualities and freedom from rot it is unsurpassed. Profitable market variety. July 10th to 15th.

Belle of Georgia.—Very large; skin white, with red cheek; flesh white, firm and excellent flavor; the fruit is uniformly large and showy; a very prolific bearer. July 15th to 20th.

Rochester.—A new yellow freestone variety. The fruit is large, yellow, sweet, juicy and of delicious flavor, keeping and shipping well; skin prettily blushed. Tree strong grower and hardy; prolific bearer. Ripens about July 25th.

Crawford's Early.—The best early yellow freestone; one of our oldest varieties. Ripens about August 1st.

Champion.—Originated at Nokomis, Ill. Flavor delicious, sweet, rich, juicy, surpassing all other early varieties. Skin creamy white with red cheek. Early, productive and large. Perfect freestone. August 10th to 15th.

Elberta.—Supposed to be a seedling of Chinese Cling, but is entirely free. Very large, yellow with red cheek; flesh yellow, firm, juicy and of high quality; exceedingly prolific; sure bearer and hardy. August 15th to 20th.

J. H. Hale.—"Everybody has heard of this variety; ripens about the same time as Elberta; said to be larger and better flavored, highly colored." We have only a limited number to offer this year. August 15th to 20th.

Crawford's Late.—Ripens from 14 to 20 days later than the Crawford's Early and is larger in size; color about the same, only a little darker red and yellow. One of the best and finest yellow freestones; moderately productive. August 25th to 30th.

Stump.—Very large, roundish; skin white, with bright red cheek; flesh white, juicy. One of the best late freestones. September 1st to 5th.

J. H. Hale

Elberta

Salway.—Large, creamy yellow, with crimson cheek; flesh deep yellow, juicy, rich, sweet. September 15th to 20th.

Heath Cling.—One of the finest canning peaches; good size; lemon shape; tree a good grower and excellent bearer. September 15th to 20th.

Krummel's Late.—Found in an orchard on property of Mr. Krummel of St. Louis. Color a rich golden yellow, with bright red cheek; round; freestone; juicy. Ripens here about October 5th, and is a good keeper.

Chinese Cling.—The most popular Southern peach; shape is oblong; has creamy skin with faint flashes of red. August.

Japan Blood Dwarf.—Heavy bearer, making necessary thinning of fruit which is dark red; flesh red; juice red. A freestone. A fine fruit for all purposes and a sure money-maker. Plant some of these without fail.

Indian Blood Cling.—One of the best for canning, pickling and the making of preserves. Last of August or about the first of September. A variety much in demand on the market and for home use.

APRICOT TREES

Note.—We are introducing our new variety, "The Late Moorpark," an apricot that bears fruit from ten days to two weeks later than the fine Moorpark, thereby escaping the early frosts. Disregarding the custom of charging more for specialties, we are offering this fine new variety at the same price as the others. Order before these are all gone, as we have only a limited number for sale.

	Each	10	100
2-year, 2 to 3 feet, branched.....	\$.30	\$2.70	\$25.00
2-year, 3 to 4 feet, branched.....	.45	4.00	35.00
2-year, 4 to 6 feet, choice.....	.60	5.50	50.00
2-year, 5 to 6 feet, select.....	.75	7.00	60.00
5 at 10 rates; 30 at 100 rates.			

Late Moorpark.—One of the largest. Orange with red cheek; firm, juicy, with a rich flavor; quality unexcelled. The most popular standard variety. Late.

Royal.—Good sized where thinned; oval, slightly compressed; yellow with orange cheeks, faintly tinged with red; flesh pale orange, firm and juicy with a rich vinous flavor; exceedingly productive. Early June.

Early Golden.—Medium size; golden yellow. Moderately juicy and sweet. Ripens first of July.

Superb.—A hardy Russian Apricot that originated in Kansas and largely planted in the Central West. The tree is thrifty and hardy.

NECTARINE

Choice, Budded, Whole Root

	Each	10	100
All Budded, 2-year, 3 to 4 feet, branched.....	\$.50	\$5.00	

The nectarine has a smooth skin like the plum and is much like the peach in other ways. It requires the same culture as the peach. Quality very good.

A Table Showing the Number of Trees or Plants to the Acre

Distance.	No. of trees.
1 foot apart each way.....	43,560
2 feet apart each way.....	10,890
3 feet apart each way.....	4,840
4 feet apart each way.....	2,702
5 feet apart each way.....	1,742
6 feet apart each way.....	1,210
7 feet apart each way.....	888
8 feet apart each way.....	680
9 feet apart each way.....	537
10 feet apart each way.....	434
11 feet apart each way.....	360
12 feet apart each way.....	302
13 feet apart each way.....	257
14 feet apart each way.....	222
15 feet apart each way.....	193
16 feet apart each way.....	170
17 feet apart each way.....	150
18 feet apart each way.....	134
19 feet apart each way.....	128
20 feet apart each way.....	109
25 feet apart each way.....	68
30 feet apart each way.....	40

Rule.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

PEAR TREES

The pear is the most delicious of our modern fruits because of its fine juicy texture, exquisite flavor and aroma. The pear is also a very decorative tree and is used in landscape work because of its beauty. We recommend in the standard sorts the Kieffer, Bartlett, Howell and Duchess. In the dwarf sorts, we recommend the Seckel, Duchess and Anjou.

STANDARD—The Best Flavored Sorts

	Each	10	100
2-year, 3 to 4 feet.....	\$.50	\$4.50	\$40.00
2-year, 4 to 6 feet, branched.....	.70	6.50	60.00
2-year, 5 to 6 feet, select.....	.90	8.50	80.00

5 at 10 rates; 30 at 100 rates.

Bartlett.—One of the most popular pears; large, buttery and melting, with rich flavor. Tree a vigorous and erect grower; bears young and abundantly.

Garber.—One of the Japan Hybrids; the best and handsomest of its class. Earlier than Kieffer, larger and much better quality; free from blight; very hardy. Immensely productive; bears young; excellent for canning or preserving.

Howell.—One of the finest American pears. Large, handsome, sweet and melting; tree very vigorous, hardy and productive.

Kieffer.—This is a seedling raised from the Chinese Sand Pear crossed with the Bartlett. Skin rather rough. Color yellow, with red cheek in the sun. Flesh white, juicy, buttery and rich.

Duchess.—See description below. Very profitable for market.

DWARF

	Each	10	100
2-year, 3 8-inch diameter.....	\$.40	\$3.75	\$35.00
2-year, 1 2-inch diameter.....	.70	6.50	60.00
2-year, 5 8-inch diameter.....	.90	8.50	80.00

5 at 10 rates; 30 at 100 rates.

Duchess.—The largest of our good pears; succeeds on pear, but attains its highest perfection on quince, and is a beautiful and vigorous tree. Most profitable for market.

Seckel.—The standard of excellence in pears. Small but of highest flavor. Tree a strong, slow, erect grower; very hardy and bears abundantly.

Anjou.—A large, fine pear, buttery and melting, with sprightly vinous flavor. Tree a vigorous grower and good bearer. Best on quince.

See full color illustration on second cover page

Seckel Pears

PLUM TREES

The plum is one of our best fruit trees. These trees are very hardy, sturdy, and disease-resistant. They respond readily to good cultivation and care. We recommend especially the Japanese Hybrid sorts of which the Burbank, Abundance, Wickson and Red June are excellent. In the American varieties, we recommend the Shropshire Damsen and German Prune. There are some good plums in the domestic varieties, including the Bradshaw, Green Gage, America, Gold and Lombard.

	Each	10	100
2-year, 2 to 3 feet, branched.....	\$.25	\$2.25	\$20.00
2-year, 3 to 4 feet, branched.....	.37	3.20	30.00
2-year, 4 to 6 feet, choice.....	.45	4.20	39.00
2-year, 5 to 6 feet, select.....	.70	6.50	60.00

See full color illustration on second cover page

Domestic Varieties

Wild Goose.—Well known, large, deep red when ripe. Good quality; one of the best native plums; should be in every orchard. July.

Bradshaw.—Very large; dark violet-red; flesh yellowish, juicy, pleasantly sub-acid; tree vigorous and productive.

Green Gage.—A fine, handsome plum of exceptionally large size. Very desirable in many ways; for home use or market. Fruit greenish in color.

America.—Ripens July; color, yellow, changing to red. Medium cling.

Gold.—Fruit clear, light golden yellow, later nearly covered with a hazy carmine blush. When fully ripe a light cherry-red. Tree does best in chicken yards and on thin and clay soils; strong, healthy and one of the hardiest.

See Cherry, page 8 for Cherry-Plum.

Blue Damsen

Green Gage

European Varieties

Blue Damsen.—A valuable market sort. It bears enormous crops. Thousands of bushels are annually sold on our markets. It is the best plum for preserving. August and September.

German Prune.—Large, dark purple, sweet, good. One of the most popular and desirable for canning. September.

Lombard.—Medium, violet red, juicy, good, hardy and productive; the leading market variety. August.

Shropshire.—An English variety of great merit for preserving. An abundant bearer and hardy.

Hansen Hybrids

Waneta.—Good red color, skin free from acidity and with delicious flavor. Two inches in diameter. Bear heavy and often have to have some picked from the tree to keep limbs from breaking. Often bears second year when tree is well cultivated.

Sapa.—Very fine, perfectly hardy. Glossy, dark purple skin with rich dark purplish-red flesh.

Opata.—Very beautiful when in bloom. Color of flesh green, flavor very pleasant. Ripens with us about July 10th, and will hang on the trees in good condition for about two weeks.

Hanska.—Bright red, heavy blue bloom, firm flesh, good quality, rich fragrance, bears early in abundance. When cooked has the flavor of an Apricot. Keeps well and has proven to be a good shipper.

Japan or Oriental Varieties

Abundance.—Medium if allowed to mature as the fruit sets on tree, but large when fruit is properly thinned. As this variety is inclined to overbear, it is best that the fruit be thinned by taking at least one-half to two-thirds the fruit off when size of small marbles; the remaining fruit will be of extra size to more than make the same yield. Roundish, skin yellow, washed with purple with a bloom; flesh yellow, juicy, sub-acid with apricot flavor, quality superb.

Burbank.—Large, nearly globular; clear cherry-red, with a thin lilac bloom; flesh a deep yellow, very sweet and agreeable flavor. Hardy; one of the best for both garden and market planting. August.

Wickson.—A sturdy, upright grower, productive almost to a fault; fruit remarkably handsome, deep maroon; stone small; flesh fine texture, firm, sugary and delicious. Excellent keeper and fine shipper.

Red June.—It is the most satisfactory pure Japanese variety. Dark cherry-red, very showy, good size, good quality, and rots less than any other Japanese variety. An ideal early plum.

Our Extra Heavy, Rooted Plums Will Please—Choice Selected Stock

Large Montmorency

CHERRY TREES

Sweet Varieties

We recommend in the sweet cherry the Black Tartarian, Lambert, Governor Wood and Windsor. These varieties are fine for Colorado, New Mexico, and to a lesser degree in Kansas, Oklahoma and Nebraska.

2-year, 5 to 6 feet, select.....	.90	8.50	80.00

5 at 10 rates; 50 at 100 rates.

Bing.—Very large; dark brown—almost black; flesh firm, sweet, rich and delicious. A noted western sort. Late.

Tartarian (Black).—Very large, black, juicy, rich. End of June.

Governor Wood.—Large, light red, juicy, rich, delicious. June.

Windsor.—Fruit large; heavy bearer; beautiful dark color, almost black.

Lambert.—Largest of all; dark red; flesh firm and sweet. An excellent shipping cherry. Late.

Compass Cherry-Plum

Sour Varieties

We recommend the sour cherry, including the Early Richmond, Montmorency and English Morello, for best results in Kansas, Oklahoma, Missouri, Nebraska and Arkansas. They produce well and are very hardy.

FINE SELECTED STOCK

	Each	10	100
1-year, 2 to 3 feet.....	\$.27	\$2.50	\$21.00
1-year, 3 to 3½ feet.....	.37	3.50	30.00
2-year, 4 to 5 feet, branched.....	.55	5.00	40.00
2-year, 5 to 6 feet, select.....	.70	6.50	60.00

5 at 10 rates; 30 at 100 rates.

Early Richmond.—Medium size, light red; melting, juicy, sprightly acid flavor. Tree healthy and productive. One of the most popular early cherries.

Large Montmorency.—Large red cherry, ripening ten to fourteen days after Early Richmond. Tree a slow but stiff grower; very profitable bearer; valuable late sour cherry.

English Morello.—Good size, very dark red when fully ripe, rich, acid, juicy, excellent for canning. Later than Montmorency.

Wragg.—Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the prairie regions of the Northwest. Appears identical in tree and fruit with English Morello, but is claimed to be a new variety. Valuable late cherry. July.

Duke Varieties

May Duke.—Medium, dark red, melting, rich, juicy, excellent. A reliable early cherry, nearly sweet.

CHERRY-PLUM

Compass.—This is a hybrid of a plum and cherry. In size larger than the largest cherry but rather a small plum. Shape of plum with cherry quality. It will succeed where the true cherries will not and thus afford one with the best possible substitute for the cherry. The tree is vigorous, bears young. The fruit is red, rather tart. Fine for jellies and preserves. Ripens early in June.

MULBERRY TREES

These include the improved bearing Mulberries in the varieties of Hicks, Downing and New American.

	Each	10	100
3 to 4 feet.....	\$1.00	\$9.00	\$75.00
4 to 5 feet.....	1.25	10.00	85.00

New American.—Equal to Downing in fruit, but much harder. Vigorous grower, very productive; the best variety for fruit; ripe from middle June to middle September.

5 to 6 feet...... 1.25

Russian.—Very hardy, vigorous grower; valuable for feeding silk-worms, also relished by birds.

5 to 6 feet...... .75 6.00

Downing.—Very large, black, handsome, sweet, rich and excellent.

5 to 6 feet...... 1.25

Hicks Everbearing.—Profuse bearer of fruit for three months; fine grower for shade; the best of all trees for the fowl yard, as the fowls greedily eat the berries.

QUINCE TREES

	Each	10	100
2-year, 2 to 3 feet.....	\$.75	\$7.00	...
2-year, 3 to 4 feet.....	1.00	9.75	...

Champion.—Originated in Connecticut. The tree is a prolific and constant bearer; fruit averaging larger than the Orange, but not so highly colored; more oval in shape. Quality equally as fine, and a good keeper.

Orange.—Fruit large, bright yellow color; a good bearer. The standard variety in quince.

Berries and Small Fruits

We are selling more small-fruit plants each season. People are beginning to appreciate the true worth of these plants. Every home garden should contain some of these productive plants. Small-fruit plants are quick to start and quick to produce crops. They cost but little and you are more than well repaid for your efforts.

Our small-fruit plants are produced on the rich bottom lands which give the plants that wonderful massed root system. We are offering to our trade this year some of the two-year-old transplants in the raspberries. We recommend these plants as they will start quicker and bear crops sooner and are a better buy than the younger plants in case you want only a minimum number.

Our small-fruit plants are kept carefully cultivated and hoed and we get the maximum growth on our plants. We do not sell you the real small plants that fail to come up to grade. We ask that you give our small fruits a trial and we know they will please you. In most rural communities, fresh fruit is hard to obtain so we advise you to grow your own since it is so essential to good health.

Downing Mulberries

Gooseberries

One of the hardiest groups of the small fruits. They are sure to bear each season.

GOOD STRONG BUSHES

	Each	10	100
Carrie (largest grown).....	\$.30	\$2.50	\$20.00
Pearl.....	.25	2.00	18.00
Houghton.....	.25	1.75	15.00
Downing.....	.25	2.00	16.00

30 at 100 rates.

Downing.—Size medium to large, oval, greenish-white; plants vigorous, upright, very productive; never mildews.

Houghton.—A vigorous grower; very productive; not subject to mildew. Flesh tender and very good. Red when ripe.

Pearl.—Fruit is large, juicy, with good flavor. Some berries attain an inch in length. Bush is a strong, vigorous grower. This variety is very productive.

Carrie.—This Minnesota variety has proven very successful throughout the middle west. The berries are very large, and the bushes are very productive. Berries turn to reddish-yellow when ripe. We recommend the Carrie highly.

There isn't anything better than gooseberry jam; it is easy to grow enough for both home and market.

Downing Gooseberries

CURRENTS

Perfection Currants

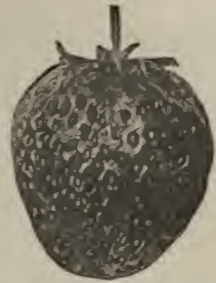

One of the hardiest and most easily cultivated of the small fruits. Excellent bearer of quality fruit with a small amount of care. Indispensable for table use, jellies, etc. We recommend the Perfection and Fay in the red groups and the White Grape in the white group. We recommend the Champion in the black group.

These are tested varieties and will please you.

PRODUCING STRAINS

	Each	10	100
Perfection, or Cherry.....	\$.25	\$2.25	\$20.00
Fay's, or Champion.....	.30	2.50	23.00
White Grape, or Wilder.....	.25	2.25	20.00

50 at 100 rates; 500 at 1,000 rates.

Mastodon Strawberries

Fay.—The best currant yet introduced; berries are large, uniform in size, with long stems, good flavor, and is very productive and easy to pick.

Perfection.—The color is a beautiful bright red. Size as large or larger than Fay, the clusters averaging longer. The Perfection has a long stem from the point of attachment to the bush to the first berry, making it easy to pick without crushing any of the berries. It is a great bearer, and on account of its great productivity the plants should be kept well cultivated and fertilized, as should all heavy bearers. The Perfection ripens about the same time as the Fay. Quality rich, mild, sub-acid, plenty of pulp, with few seeds.

Wilder.—Introducer says: "Wilder will make twice as much wood as will Fay's Prolific, while setting as large fruit with double and triple the quantity; combines more good qualities than any currant he has ever fruited." It is large, very productive, sweet and hangs a long time on the bushes in fine condition after fully ripe.

White Grape.—Large, yellowish-white; sweet or very mild acid; excellent quality and valuable for table use. Productive.

Cherry.—Very popular in market and brings several cents more per quart than any other old variety.

Black Champion.—Very productive; large bunch and berry; excellent quality; strong grower.

STRAWBERRIES

Note.—Strawberry plants are packed 25 in a bunch. We do not break bunches. Plants should be ordered sent by express or parcel post at your expense. It is conceded that we have the best rooted plants in the country.

Standard Varieties.....	25	100	1000
Everbearing Varieties, Superb, Progressive and Champion.....	\$.50	\$1.25	\$8.00
	.75	2.00	12.00

Spring-Bearing Varieties

Senator Dunlap.—This berry is of the Warfield type, has a perfect blossom, is hardy, productive, a splendid keeper and able to hold its own under any "rough and tumble" methods of culture to which it is likely to be subjected. It is a very heavy bearer of good size, even fruit, of a very beautiful dark red color. It is a berry to grow for either home use or market.

Klondike.—One of the most successful mid-season varieties for the Southwest. Bright red with prominent golden seeds. Large and prolific.

Aroma.—Is a very dependable, late variety. Grown and liked everywhere. Berries are very firm, dark red throughout, medium to large, and their good flavor and color hold well after cooking. It is the best all-around late berry.

Superb

Everbearing Varieties

Progressive Everbearing.—The best of all everbearing varieties. The new runner plants produce a nice lot of berries in good quality. The fruit of Progressive is of good color and appearance. Very strong plants; heavy bearer.

Superb.—Fruit is large, shapely red, excellent quality; it fruits lightly in spring and heavier in summer and fall; needs good culture and watering if season is dry.

Champion.—In reasonably rich soil it sends out many runners when set early in spring. The berries are dark red, sweet, well flavored, medium in size. Next to the Mastodon we find it the best everbearer.

See color illustration on back cover.

Mastodon.—The Berry—Very large from beginning to end of season. Never "run", small. Medium to dark red, evenly colored all over. Flesh red to core, firm—irregular cone to wedge-shape. Seed yellow, prominent. Flavor mild sub-acid; good. The Plant—Large, vigorous, thrifty grower; leaves dark green, large; crowns big, sending out numerous strong, fruiting stems supporting as high as 30 berries each. Runners medium to numerous, making a good fruiting row. Roots numerous, fibrous, well branched, long. Has perfect blossoms, bears when planted alone.

Price.....	25	100	1,000
	\$1.00	\$2.75	\$15.00

BLACKBERRIES

Our blackberries are all produced from strong cuttings. Our plants are sturdy, well rooted and capable of making a good start. We handle all the old favorites and some of the new tested sorts.

We recommend the new Blowers, hardy and productive, berries jet black and of large size. Has produced 2,720 quarts on one-third of an acre. Do not miss this excellent blackberry.

ALL ROOT CUTTING PLANTS

	Each	10	100	1,000
Early Harvest (very early).....	\$.15	\$1.00	\$3.50	\$25.00
Blowers, large fruit.....	.20	1.50	7.00	35.00
Snyder.....	.15	1.25	5.00	30.00
Mersereau, or Eldorado.....	.20	1.75	7.00	40.00

50 at 100 rates; 300 at 1,000 rates.

Mersereau.—Mid-season. Beautiful, glossy black. Resembles Snyder, but larger, better quality, and less likely to turn red after picked. Canes rather spreading first season, becoming upright following year. Fruit large, rather round, good quality and holds up well. Everything considered, we believe Mersereau the best blackberry for general planting. Our best seller. Eating, cooking, canning, market.

Blowers.—Originated in Chautauqua county, N.Y. Claimed to be the hardest, most productive and the finest quality of all the blackberries. Large size, jet black, good shipper. We believe this variety has special merit.

Early Harvest.—This is one of the earliest blackberries in cultivation; a compact, dwarf grower; fruit medium size and fine quality; an enormous bearer.

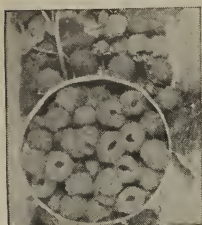

Early Harvest

Mersereau

DEWBERRIES

St. Regis Raspberries

*Asparagus
and Rhubarb
listed on
page 27*

	Each	10	100	1,000
Lucretia, Good No. 1.....	\$.15	\$1.25	\$4.00	\$25.00
Austin, Fancy.....	.15	1.25	4.00	25.00

50 at 100 rates; 300 at 1,000 rates.

Lucretia.—One of the low-growing, trailing blackberries, in size and quality it equals any of the tall-growing sorts. Perfectly hardy, healthy and remarkably productive, with large showy flowers. The fruit, which ripens early, is often one and one-half inches long by one inch in diameter; soft, sweet and luscious throughout, with no hard core; ripe before late raspberries are gone. Should be mulched to keep berries from the ground.

Austin.—Very large, acid, vigorous, very prolific and the most valuable of dewberries.

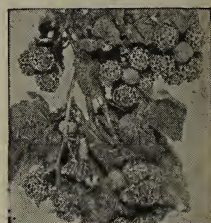

Lucretia Dewberries

RASPBERRIES

Will grow on any soil that will produce corn. These plants are very hardy and productive. Patches should be well cultivated and fertilized once a year. Mulch during the winter and prune out all old canes. We recommend in the black raspberry group the Plum Farmer and Cumberland. The Plum Farmer has especially a fine fruit of large size and excellent flavor. In the red raspberry group we recommend the St. Regis Everbearing and the King. We recommend the two-year transplants in the St. Regis, Cumberland and Kansas. They are heavy plants, strongly rooted and will bear sooner.

RASPBERRIES ARE MONEY MAKERS

Cumberland Raspberries

Red Sorts

	Each	10	100	1,000

St. Regis, 2-year-old transplants.....	.25	2.00	8.00	45.00

50 at 100 rates; 300 at 1,000 rates.

Cuthbert.—A remarkably strong, hardy variety; berries very large, rich crimson, very handsome, sweet, rich and luscious; highly flavored.

King.—Said by many to be the best early red raspberry. Plant a strong grower, hardy and productive. Berry firm; good shipper; large size; color bright scarlet.

St. Regis.—Begins to ripen with the earliest and continues to bear on young wood until October. Berries bright crimson, large size, rich sugary raspberry flavor. Flesh firm and meaty, a good shipper. Wonderfully productive, the first or main crop, equaling any red variety known. Canes stocky, of strong growth, with abundant dark green leathery foliage. Try it.

Cardinal.—A very large, dark red, prolific variety of best quality of the successful Southwestern varieties.

Black Sorts

	Each	10	100	1,000
Plum Farmer, extra choice transplants.....	\$.20	\$1.75	\$8.00	\$45.00
Cumberland, 2-year transplants.....	.20	1.50	6.00	40.00

Kansas, sure bearer, choice tips.....	.15	1.20	4.00	22.00
Kansas, 2-year-old transplants.....	.20	1.50	6.00	40.00

50 at 100 rates; 300 at 1,000 rates.

Cumberland.—The largest of all black caps. A healthy, vigorous grower, throwing up stout, stocky, well-branched canes that produce immense crops of magnificent berries. Fruit very large, firm; quality about the same as Gregg; keeps and ships well as any of the blacks. The most profitable market variety.

Kansas.—A strong, vigorous grower, standing extremes of drought and cold and bearing immense crops. Early, berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality; presents a handsome appearance and brings highest price in market.

Plum Farmer.—A few days later than Kansas; matures its crop in a very short period, making it one of the most profitable early market sorts. Berries are thick-meated, firm, with a bloom similar to Gregg. Large berries.

Gregg.—Extra big, enormously productive. Hardy; firm black meaty berries. Late ripening and firm for shipping.

GRAPES Extra Well Rooted No. 1 Grade Good Stocky Roots

Our grapevines are grown in the rich river bottom lands where we can produce those "wonderful root systems." Our cuttings are made from vines that show maximum production. We recommend the Concord for the best all-around grape for commercial purposes. The Worden, Moore's Early, Brighton, Niagara and Agawam are all fine producers. Don't fail to try some of the McPike, the largest grape that is adapted to this section.

	Each	10	100

Catawba.....	.25	2.25	20.00

50 at 100 rates; 300 at 1,000 rates.

Blue and Black Sorts

Campbell's Early.—A fine healthy and early variety, profuse bearer. Ripens with the Moore's Early but keeps on the vine or in the house for weeks.

Concord.—The old standby. A large, purplish-black grape; vines remarkably hardy, vigorous and productive. Very popular; best market sort.

Moore's Early.—Bunch medium, berry large, round, with heavy bloom; vine exceedingly hardy, entirely exempt from mildew or disease. Its earliness makes it desirable for an early market. Two weeks earlier than Concord.

Worden.—A splendid large grape, of the Concord type, but earlier and in every way as healthy. Quality good to best.

Red or Amber Sorts

Agawam (Rogers' No. 15).—Berries very large, with thick skin; pulp soft, sweet and sprightly; very vigorous; ripens early.

Brighton.—Bunch large, well formed; berries above medium to large, round; excellent flavor and quality; one of the earliest in ripening.

Catawba.—Bunches of good size, rather loose; berries large, round; when fully ripe of a dark copper color, with a sweet, rich musky flavor.

Delaware.—Bunches small, compact, shouldered; berries rather small, round; skin thin, light red; flesh very juicy, without any hard pulp, with an exceedingly sweet, spicy and delicious flavor.

White Sorts

Niagara.—Vine remarkably hardy; strong grower; bunches very large and compact, sometimes shouldered; berries large; light greenish-white; semi-transparent; slightly ambered in the sun; skin thin but tough, and does not crack; quality good; very little pulp; melting and sweet to the center.

Moore's Diamond.—Grape from Concord seed, fertilized with Iona. In vigor of growth, color and texture of foliage and hardness of vine it partakes of the nature of its parent Concord, while in quality the fruit is equal to many of the best tender sorts, and ripens two weeks earlier than the Concord.

Ornamental Flowering Shrubs

These plants are the hardiest of the ornamentals. Shrubs can be rightly used in almost any position of the landscape. We recommend them for foundation plantings, corner groupings, screenings, and for individual plantings. We carry the most complete line of shrubs in the Middle West and have the kind you want for every purpose. Our plants are grown in rich soils, kept carefully pruned, and carefully cultivated so that every shrub is really a specimen plant. If in doubt about shrub placement or any other landscape work, write us at once.

Each 10

Althea (Rose of Sharon).—These are very fine, hardy, free-growing, flowering shrubs, of very easy cultivation, and very desirable on account of their late summer blooming. Should be in every garden. Our collection comprises a great variety of colors and shades. 2 to 3 feet. \$.50 \$4.50

Arrow-wood Viburnum.—A fine shrub for massing for foliage effect. Flowers greenish-white. 2 to 3 feet.60 5.50

Barberry, Japanese (Berbery).—From Japan. A very pretty species of dwarf habit, small foliage, changing to a beautiful coppery-red in autumn. Valuable as an ornamental as well as hardy hedge. 18 to 24 inches.60 5.75

Buckthorn.—3 to 4 feet.60 5.50

Butterfly Bush.—A most beautiful shrub and one that should be in every garden. A splendid shrub for park planting. It makes large shrubs even from small plants the first season. Single plants will often have 50 or more flower spikes the first year. The second year after planting it generally begins to bloom in June and continues throughout the summer until frost nips it. The flowers are produced on long, graceful stems that terminate in tapering panicles of beautiful lilac-colored flowers of miniature size and borne by the hundred on flower heads frequently 10 inches long. This admirable shrub should be classed as semi-herbaceous, as it sometimes freezes back to the ground in severe winters, but comes up again from the roots. A mulch of manure, leaves or other suitable material should be given before heavy freezing weather sets in. You should try some of these; you will be delighted with them. 2 to 3 feet.60 5.75

Calycanthus (Sweet Scented).—A well-known native bush, bearing double, purple, fragrant flowers. 18 to 24 inches.60 5.00

Caragana (Siberian Pea Tree).—A showy dwarf tree or shrub with pretty pea-shaped yellow flowers in May and June. 3 to 4 feet.80 7.50

Cotoneaster.—2 to 3 feet.60 5.50

Dogwood, Flowering (Cornus).—A well-known shrub of irregular shape, but very desirable for flower effect in the early spring before its leaves appear. Excellent in shrub borders. 2 to 3 feet.65 6.00

Dogwood, Yellow Barked.—A very pretty shrub for winter color effect, bark bright yellow.65 6.00

Dogwood, Red Barked.—Low-spreading shrub, with bright red twigs; very attractive in winter.65 6.00

Cut Leaf Elder.—Deeply cut green foliage. Very hardy and beautiful in combination with other shrubs. 2 to 3 feet. \$.65 \$6.00

Golden Bell (Forsythia).—A very early and showy spring bloomer; flowers bright yellow; branches long and slender. 2 to 3 feet.50 4.50

Honeysuckle, Morrows Bush.—A fine variety from Japan, valuable for its handsome red fruit. A fine compact growing shrub. Will grow in any location. 2 to 3 feet.55 5.00

Honeysuckle, Tartarian Bush.—A compact, much-branched leafy shrub of pleasing appearance. Bears small pink flowers, of typical Honeysuckle form. 2 to 3 feet.55 5.00

Hydrangea (Hills of Snow).—This is one of the most valuable hardy shrubs in cultivation. It attains a height of six to eight feet, and is perfectly hardy in all parts of the country. The flowers are white, borne in immense pyramidal panicles nearly a foot in length. It commences flowering in July and continues until November. This is the finest flowering shrub for cemetery planting we know of. 18 to 24 inches.80 7.50

Hydrangea paniculata.—A beautiful plant, showy and attractive, remaining in bloom from July to October. Flowers are pure white and are borne in immense clusters. 18 to 24 inches.80 7.50

Japanese Quince (Cydonia).—Flowers very abundant, brilliant crimson scarlet. The most beautiful of the early spring blooming shrubs. 18 to 24 inches.90 8.50

Kerria (White).—Attractive shrub. Graceful, slender green branches. Tender in far north. 2 to 3 feet.75 7.00

Wichita Nurseries,
Wichita, Kansas.

Gentlemen:

Upon investigation myself, I find that the trees were all O. K.
Yours very truly,

R. D. Matheson, Colorado.

Althea used as a hedge

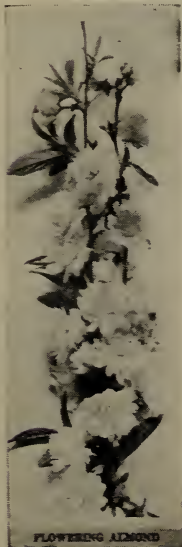

Deutzia Gracilis (Dwarf).—A low bush, three or four feet in diameter; flowers pure white and graceful. One of the prettiest and most popular small shrubs. Fine for winter forcing. 18 to 24 inches. \$.65 \$6.00

Deutzia Crenata (Pink Blossoms).—The beautiful pink single-flowered species that is a mass of bloom in June. Often preferred to the double sorts. 2 to 3 feet.50 4.50

Deutzia, Pride of Rochester.—A fine double variety, rather earlier than D. Crenata. Flower pink in bud, white when fully expanded. 2 to 3 feet.50 4.50

Flowering Almond (Pink and White).—A class of ornamental shrub or small tree introduced from the mountains of Asia Minor, and succeeding well in common garden soil. The flowers are very showy, produced in great abundance, and useful for their earliness. Fine plants to use in grouping or for lawns. 2 to 3 feet.90 8.50

Golden Elder (White Blossoms).—A beautiful golden-foliated form. Very useful for foliage effect. 2 to 3 feet.65 6.00

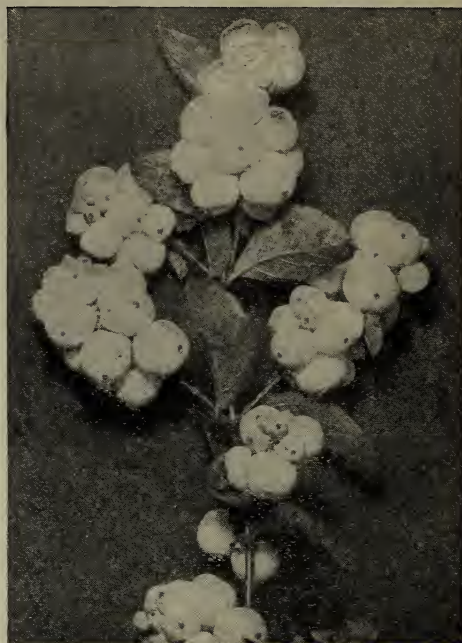

FLOWERING ALMOND

DEUTZIA

FLOWERING SHRUBS--Continued

Lilac (Purple). —Large shrub with large leaves and flowers. Flowers bluish-purple. Fine for specimen planting or for screenings. 2 to 3 feet.	Each 10	
		\$.65 \$6.00
White Lilac (Syringa Alba). —Flowers in slender panicles, pure white and fragrant. 2 to 3 feet.75 7.00
Lilac (Named Varieties). —The French named lilacs offer a superb combination of new gorgeous colors. We recommend them, as they will please.		1.25 10.00
Chas. X.—Single purple.		
Marie Legraye.—Single white.		
Pres. Grevy.—Double blue.		
Belle de Nancy.—Double pink.		
La Tour.—Double purple.		
Crepe Myrtle. —This is a Southern plant, much esteemed, very effective both as a single specimen or in groups as a large shrub. Blooms throughout the entire summer, producing great masses of beautifully fringed flowers in immense panicles. A single shrub on the lawn is most effective, or a mass of them produces a most magnificent background. The crimson is a beautiful bright red. The light pink is very distinct. We have four colors in stock—red, pink, purple or white. 2 to 3 feet.80 7.50
Russian Olive (Elaeagnus). —A large shrub, sometimes of tree form, with long, narrow, silvery green foliage. The flowers are yellow followed by yellow fruit. 2 to 3 feet.50 4.50
Snowball (Common). —An old and well-known shrub, bearing large balls of pure white flowers. 2 to 3 feet.90 8.50
Snowball (Japanese). —A rare and exceedingly beautiful species of Japan; flowers in large, globular heads, pure white, hanging long on the bush; a very choice and desirable shrub. 18 to 24 inches.		1.00 9.00
Mock Orange (Philadelphus). —Fragrant pure white flowers, in dense clusters so numerous as to bear the branches down when flowering. One of the best. 2 to 3 feet.50 4.50

Snowberry

SPIREA (Meadow Sweet)

An indispensable class of small to medium-sized shrubs, embracing a wide range of foliage, habit of growth, color of flowers and season of blooming. All of easiest culture in all soils.

S. Van Houtti (Bridal Wreath). —The grandest of all the Spireas. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. Clusters of twenty to thirty flat, white florets make up the racemes, and these clusters are set close along the drooping stems. Perfectly hardy and an early bloomer. 18 to 24 inches.	Each 10	
		\$.30 \$2.75
2 to 3 feet.40 3.50
3 to 4 feet.55 5.00
S. Billardi. —Medium sized shrub, producing spiked panicles of flowers, bright rose color. A fine, medium growing shrub, blooms throughout the season. 18 to 24 inches.50 4.75
S. callosa alba. —Of compact growth, with upright branches, crowded with large, flat clusters of white flowers nearly all summer. 12 to 18 inches.65 6.00

S. Anthony Waterer. —A new crimson-flowered variety; one of the most beautiful of dwarf flowering shrubs. It makes a low compact bush, 15 to 18 inches high, and is covered nearly the whole growing season with large umbels of deep crimson flowers. Perfectly hardy, it makes a fine, compact plant for low clumps or for bedding purposes. Blooms throughout the growing season. 12 to 18 inches.	Each 10	
		\$.75 \$7.00
S. Thunbergii. —Dwarf habit and round, graceful form; branches slender and somewhat drooping; foliage narrow and yellowish-green. Flower small white. Early bloomer. 18 to 24 inches.60 5.50
S. aureau. —Sturdy, upright shrub with golden green leaves. Flowers white and extremely beautiful in contrast to golden foliage. This shrub should be planted in partial shade. 2 to 3 feet.65 6.00
S. Froebelli. —Flowers bright rosy-red, in flat umbels. This is one of our finest Spireas, excellent as a border shrub. Foliage turns purple in the fall. Branches willowy. Should be in every garden. One of the best of our low-growing shrubs. Blooms throughout the growing season. 12 to 18 inches.55 5.00

Snowberry (White Berries). —Flowers inconspicuous, rose-colored in June and July; leaves thin, dark green; fruits large, milk-white, clustered; persistent until late in winter. 18 to 24 inches.	Each 10	
		\$.50 \$4.50
Snowberry (Red Berries). —18 to 24 inches.45 4.00

Spirea Van Houtti (Bridal Wreath)

Sumac aromatica (Fragrant Sumach). —A native variety, exhaling a strong odor. Flowers greenish-white; leaves lobed. 18 to 24 inches.	Each 10	
		\$.60 \$5.50
Sumac (Smooth Sumach). —Very effective in autumn with its crimson seeds and foliage. 2 to 3 feet.55 5.00
Sumac (Cut-leaved). —A variety with deeply cut fern-like foliage. An elegant plant for groups on the lawn. 2 to 3 feet.60 5.50
Sumac (Staghorn Sumach). —A large shrub or tree, brilliant foliage and scarlet fruit in autumn. 2 to 3 feet.65 6.00
Tamarisk Hispida. —The best of the new Tamarix varieties. Foliage soft blue-green, flowers delicate pink occurring in early fall. 2 to 3 feet.75 7.00
Tamarix Africana (Pink). —A tall, graceful shrub with small foliage like a Juniper, and delicate small rosy-purple flowers, produced in spikes; very pretty. Foliage dark green, flowers rose-pink, occurring in spring. 2 to 3 feet.50 4.50
Wegelia, Eva Rathke. —Flowers brilliant crimson, a beautiful distinct, clear shade. Foliage light green and wavy. Fine for foundation planting around house. 2 to 3 feet.90 8.50
Wegelia, Rosea (Pink Blossoms). —Flowers bright rose. A fine, medium growing shrub of fine foliage. Blooms from early to mid-season. 2 to 3 feet.65 6.00
Willow, Pussy. —Catkins silky, preceding the leaves; very useful for early effects. 3 to 4 feet.75 7.00

HEDGE PLANTS

Hedges for every use are becoming more popular every day. Hedges may be planted for security, for comfort, for landscape effect, or for hiding undesirable views. Lattice fences are far more expensive than the plant hedges and do not compare in good looks. We recommend for front and side yard the California and Amoor River privets and for the back yard the Russian Mulberry or Russian Olive. We have hedge stocks in Russian Olive, Spirea Van Houttii, Low Bush Honeysuckle, Tamarix, and other broad-leaf plants. Write for prices.

50 at 100 rates; 500 at 1,000 rates.

HARDY CLIMBING VINES

A graceful, clinging vine is always an asset to a porch or to a trellis. Vines are not only ornamental and restful to the eye but afford the quickest shade obtainable. For quick growth, we recommend the Dutchman's Pipe and the Japanese Kudzu. The Hall's Japan Honeysuckle and Clematis Paniculata are fast growers and produce exquisite, fragrant blooms. The ivys will cling to stone, brick or stucco and give a very pleasing effect. We recommend the Boston Ivy and the Engelmann's Ivy for hardiness and ornamental effects. The Wistarias, white and purple, are fast growers and have a nice foliage and fragrant flowers.

Boston Ivy

2-YEAR, STRONG, WELL ROOTED

5 at 10 rates.

Ampelopsis Veitchi (Boston Ivy or Japan Ivy).—The most popular climbing plant for covering brick, stone or wooden walls, trees, etc.; when it becomes established it is of rapid growth, and clings to the smoothest surface; the foliage is a rich olive-green during the summer, changing to various shades of bright crimson and scarlet in the fall.....

Each 10

\$1.00 \$9.00

Clematis

Ampelopsis Quinquefolia (Virginia Creeper or American Ivy).—Luxuriant in growth with handsome foliage turning to bright crimson in the fall. Very hardy vine for covering old tree trunks, walls or fences.....

Each 10

\$.50 \$4.75

Ampelopsis Engelmanni (Engelmann's Ivy).—A greatly improved variety of the Virginia Creeper, with dense foliage of a glossy light green in summer, changing to a brilliant crimson in the autumn. On a rough stone surface it will cling without support in the same way as the Japanese Ivy.....

.50 4.75

Clematis Jackmani (Large-flowering Clematis).—This variety, with its strong, healthy growth, hardy nature and rich, deep velvety-purple flowers, is the most satisfactory of its class. Blooms with astonishing profusion on shoots of the present season; should be pruned early in the spring. Blooms July and August.....

1.00 9.50

Clematis Henryii.—A magnificent, large white flower; a free grower and bloomer.....

1.00 9.50

Clematis, Madame Andre.....

Each 10

\$1.25 \$10.00

Clematis Paniculata (Japanese Clematis).—The finest small-flowered Clematis extant. A wonderfully rapid grower, quickly covering trellises, arbors, etc. The flowers are pure white, deliciously fragrant and produced with the greatest freedom. It flowers in September when few other vines are in bloom. This is the easiest to grow and most popular of all the small-flowered vines.....

.60 5.00

Bignonia Radicans (Trumpet Vine).—Dark red-orange flowers; free blooming. Very hardy and rapid grower. Useful for covering unsightly places, stumps, or wherever a showy flowering vine is desired.....

.50 4.50

Honeysuckle Halliana (Woodbine).—Flowers pure white, turning to yellow; fragrant, hardy and almost evergreen; flowers freely.....

.60 5.50

Honeysuckle Sempervirens (Scarlet Trumpet Honeysuckle).—Trumpet-shaped flowers of bright scarlet.....

.60 5.50

Each 10

Wistaria Sinensis.—The favorite variety producing thousands of pendulous clusters of delicate violet-blue blossoms, richly perfumed. One of the best hardy climbers, producing their great trusses of flowers during the month of May.....

\$.60 \$5.50

Wistaria Sinensis Alba (White Chinese Wistaria).—A choice variety with white flowers. Both this and the preceding may be grown as bushes for the lawn.....

.75 7.00

Pueraria Thunbergiana (Kudzu Vine).—Large foliage and dense shade, growing 50 feet in one season. Flowers plentiful in August; rosy-purple, pea-shaped, in small racemes.....

.75 7.00

Aristolochia Sipho (Dutchman's Pipe).—A hardy rapid-growing climber, bearing brownish-colored flowers resembling a Dutchman's pipe. While the flowers are ornamental, the vine is most desirable for the bright green foliage which retains the same color from spring until late fall.....

Honeysuckle

Wistaria

Shade Trees

We have one of the best shade tree blocks in the country. We are trimming, cultivating and growing these trees to make the best possible specimens. You will like the root systems of these trees, also the straight stems and the symmetrical heads. Give us a trial order and be convinced of the quality of our trees. Our prices have been greatly reduced to move this fine block of trees. We recommend that you try some of our nice American White Elms and Soft Maples for your shade and ornamental purposes.

5 at 10 rates; 50 at 100 rates.

Sycamore

American Elm.—The noble, drooping, spreading tree of our woods. One of the grandest of park and street trees. Select specimens.	Each	10	100

500 at 1,000 rates.		

Catalpa Bungei

Catalpa Bungei.—Rapid-growing ornamental tree which, grafted on stems 6 to 8 feet high, forms an umbrella-shaped top without pruning; leaves large, glossy deep green, heart-shaped, symmetrically arranged; flowers in June or July in large, crowded panicles a foot long, followed by the long, bean-like capsules which often persist far into the winter.

5 to 6 feet.....	\$2.00	\$16.00
6 to 8 feet. Good Heads.....	3.00	25.00

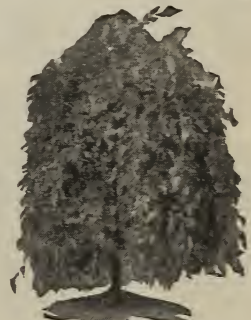

WEEPING TREES

The Weeping Trees lend grace and beauty to ornamental grounds and may be planted singly in open situations where they will fully develop. The following list contains the most hardy and desirable of this class of trees.

5 at 10 rates.

	Each	10
Thurlow Willow. —Larger, hardier and more spreading than the Babylonica. A fine variety where a large size tree is desired. 5 to 6 feet....	\$1.00	\$3.00
American Willow. —Of drooping habit and beautiful form. The most hardy of all Weeping Willows. 5 to 6 feet.....	1.00	8.00
Golden Willow. —4 to 5 feet.....	1.50	12.00
Mountain Ash. —5 to 6 feet.....	3.50	30.00
Camperdown Elm. —One of the finest weeping trees for the lawn. With broad foliage and branches drooping gracefully to the ground. 5 to 6 feet.....	3.50	30.00

Each 10

Tea's Weeping Mulberry

Each 10

Tea's Weeping Mulberry.—A graceful and beautiful hardy tree, forming a perfect umbrella-shaped head, with long, slender, willowy branches, drooping to the ground and gracefully swaying in the wind. Foliage small-lobed and of a delightful fresh, glossy green. Admirably adapted to cemetery planting. 5 to 6 feet.....

\$3.50 \$30.00

Cut-Leaf Birch.—Trunk straight, slender, white as snow; branches hanging in long pendulous threads from a great height; leaves finely cut; a universal favorite. 5 to 6 feet.....

3.50 30.00

NUT TREES

Budded or Grafted

5 at 10 rates.

Pecan. —Probably the very best of the western nut trees. The pecan has, by means of selection, been made to produce the fine thin-shelled large-fruited varieties. We recommend for your use the Stuart, Success and Schley thin-shelled varieties which we can supply in large quantities. Write for prices on 100 lots.	Each	10
Pecan Seedlings. —18 to 24 inches.....	\$.90	\$8.00
Pecan (Thin Shelled). —2 to 3 feet.....	2.00	17.50

Tree Lilac. —3 to 4 feet.....	1.75	15.00
Prunus Pissardi (Flowering Plum). —A class of ornamental shrub or small tree introduced from the mountains of Asia Minor, and succeeding well in common garden soil. The flowers are very showy, produced in great abundance, and useful for their earliness. Fine plants to use in grouping or for lawns. 4 to 5 feet.....	2.00	17.50

An Entrance Planting of Various Evergreens and Climbing Roses

Coniferous Evergreens

ARBORVITAE (White Cedar) AND RED CEDARS

The Chinese Arborvitae and the Red Cedar are two of the best evergreens for use in this middle west. They both are large-growing trees and will grow in almost any situation. The Red Cedar grows more pyramidal in form while the Chinese Arborvitae grows more globe-shaped. We offer these trees in many sizes and you will be more than pleased with the quality of our plants. Use them for specimen planting, foundation planting, screening effects, windbreaks, or hedges. Both of these trees can be trimmed to make the desired shape that you want. Trim any time during the growing season.

THE JUNIPERS

Represent a very large and varied family and grow in a great many shapes and forms, from an upright like the Irish Juniper to low, trailing kinds like the Savin or Ground Juniper. The different kinds vary in color of foliage, all shades of green, steel-blue, bronze and yellow being represented, which, when planted in groups or masses, give a very striking and pleasing effect. The dwarf kinds are fine for bedding or planting around the foundation of dwellings, instead of shrubs.

THE PINES

Are more striking and diverse in character than any other of the Evergreen family. The leaves of the Pines are needle-shape and the branches are borne in whorls or tiers, each whorl representing a season's growth. This group includes varieties from the tall, upright forms to the dwarf and spreading kinds, making them available for planting on the smallest lawn or largest estate as individual specimens.

HOW TO PLANT EVERGREENS

Dig the hole very much larger than the ball of earth which comes with the young tree, and loosen the surrounding soil. Mix some leaf mold with the soil or use some rich mountain dirt to fill in the hole. Submerge the earth ball in a tub of water for half an hour or more before planting. Do not remove the burlap from the roots, but cut the string after the tree is in the hole; the burlap helps to anchor the tree and soon rots away. Evergreens require considerable water; a thorough wetting three times a week is better than a light daily watering.

Windbreak of Various Evergreens

Evergreens growing in our nurseries—all are specimen trees

We are selling more and more evergreens for landscape planting. The people are beginning to appreciate the "all-year-around" color of these plants. Also their splendid forms and excellent foliage. We have an evergreen for every purpose—some dwarf, some tall, some ground coverers, some columnar, some globose. Our evergreens are shipped to you with their roots puddled or balled; this method protecting the tender fibrous roots. The below prices are for selected plants that we would want to place on any first-class landscape job. We recommend any of the following varieties for your purpose.

Price Each—Height in Feet. 1-1½ 1½-2 2-3 3-4 4-5

ARBORVITAE

CHINESE ARBORVITAE. —A tall fast-growing tree but not so compact.	\$1.35	\$1.75	\$3.00	\$4.50	\$6.50
BAKER'S. —Pyramidal growth, densely clothed with fresh, lively green foliage; very hardy; one of the best.	2.00	4.00	6.00	8.00	10.00
ORIENTALIS COMPACTA. —A compact form of Chinese Arborvitae. Foliage very dark green. Fine where a slow-growing, compact tree is desired.	2.00	4.00	6.00	7.00	9.00
BERCKMAN'S GOLDEN ARBORVITAE. —The most popular Biota grown. This conifer is of dwarf, compact and symmetrical habit. A perfect gem for small gardens, cemetery lots or formal planting. For window boxes and vases this variety is most effective.	3.50	5.00

JUNIPER OR CEDAR

RED CEDAR. —One of the most valuable trees for screens and windbreaks; perfectly hardy; too well known to need description. Our trees are all extra well shaped and have been several times transplanted. Light green (untrimmed).	2.00	2.75	4.25	5.50	7.50
Trimmed.	2.50	3.50	4.75	6.00	8.00
IRISH JUNIPER. —One of the most popular Junipers known. Rigidly upright and formal in character, resembling a green column.	2.00	3.50	5.00
SAVIN JUNIPER. —Compact, bushy, low-growing form with branches of beautiful deep green, standing semi-erect. Fine for massing.	4.00	5.00

PINE

AUSTRIAN PINE. —From Central Europe. Leaves or needles stiff and dark green. Hardy everywhere and one of the most valuable conifers for windbreaks, belts, etc.	3.00	3.75	4.75
MUHGO (Dwarf Mountain Pine). —Very distinct, leaves short, stiff, a little twisted and thickly distributed over the branches; does not grow tall, but spreads over the ground, generally assuming a globular form; very dense.	4.00	5.00
SCOTCH PINE. —A rapid grower, very hardy, from the central portion of Europe, with short, rigid, light green leaves. Very valuable for screens and for masses.	2.00	2.75	3.75

SPRUCE

BLACK HILLS. —Of compact pyramidal form, very symmetrical; foliage is of a bluish-green. A very pretty, compact growing evergreen.	3.00	4.00	5.00
--	------	------	------	-------	-------

Our third cover page is composed of recommended Evergreens—all are shown in natural colors and will enhance the value of your home; making a cooler appearance in summer and giving the effect of warmth in winter. We invite you to come and make your own selection.

Landscape Department

Our Landscape Service has grown to be a very important branch of the business, and we are able to point with pride to a large number of private estates, parks, cemeteries, factory grounds, etc., which we have designed and executed the past few years.

With our large list of Ornamentals, such as Evergreens, Shrubs, Trees and Plants, we are able to execute any planting either large or small in a most satisfactory manner. We do everything from start to finish.

To us one
pleased customer
is worth a
whole yardful of
dissatisfied
ones.

A judicious
planting about the
home indicates
refinement as
well as
increased selling
value.

We grow our
stock and know
its merits
when we
catalog it.

A planting of Evergreens blends beautifully with this home
Designed and executed by Wichita Nurseries Landscape Service

There is nothing
that adds as much
beauty or gives
such a degree of
refinement
to a home for as
little outlay
of work and money
as a proper
planting of trees,
shrubs, vines,
flowers and
evergreens.

Note the Natural Beauty of the Trees, Shrubs and Evergreens

of experience is
your guaranty.

Plans and Estimates

It is just as important in planting the home grounds to have a definite plan, furnished by a competent landscape architect, as to have a plan for building a modern dwelling. Attractive landscape effects are not made by guesswork but are the result of careful study and thinking.

Before making extensive plantings you should have this department make a survey of your grounds and furnish you with a properly worked-out design for beautifying them, with an estimate cost of planting.

Remember, we visit grounds, either public or private, and give suggestions for beautifying with shrubs and plants.

Owing to our immense stock of ornamentals we are able to make very low prices on a quantity.

Your correspondence is invited.

Civic pride is shown in this planting.
Designed and executed by Wichita Nurseries Landscape Service

Well-planted home grounds reflect permanency
Designed and executed by Wichita Nurseries Landscape Service

Evergreens carry their beauty and charm the year 'round and perhaps are even more appreciated in winter; their warm, green foliage contrasts so sharply with the barren winter landscape and their graceful branches bend under a mantle of newly fallen snow.

What Others Say—

Wichita Nurseries,
Wichita, Kansas.
Dear Sirs:

Your letter and card at hand but am not in need of anything this fall but take the opportunity to mention that all the trees and grapevines that I got from you last spring are growing and look good.

Respectfully yours,
Robert Karte, Kansas.

Wichita Nurseries Co.,
Wichita, Kansas.
Dear Sirs:

I have 100 of your apple trees that are two years old this spring and they are sure dandy ones. I wish you would advise me how they should be pruned this spring and do they need spray?

Yours very truly,
L. L. Swearingin, Missouri.

Wichita Nurseries,
Wichita, Kansas.
Dear Sirs:

I ordered and received over 200 trees from your nursery last spring which have proved very satisfactory. Am making a small order at this time, which ship as soon as possible. Thanking you for past favors,

Very respectfully,
W. D. Priddy, Oklahoma.

Wichita Nurseries Co.,
Wichita, Kansas.
Gentlemen:

Will say that I purchased trees from you two years ago and I have had the greatest success with them.

Very truly yours,
E. E. Moss, California.

Wichita Nurseries Co.,
Wichita, Kansas.

The grapes we got of you were the best I ever saw and in good condition. I will advertise your nursery.

Very truly yours,
C. J. Bruce, Kansas.

Wichita Nurseries,
Wichita, Kansas.
Dear Sirs:

We got some fruit trees of you a few years ago and these are so nice that we want to get some more.

Respectfully yours,
W. J. Jordan, Oklahoma.

W. F. Schell,
Wichita Nurseries,
Wichita, Kansas.
Dear Sirs:

While it has been quite a while since I ordered trees from you, all of those I have used have been satisfactory. With best wishes, I am,

Yours very truly,
J. M. Bassett, Texas.

Wichita Nurseries,
Wichita, Kansas.
Dear Sirs:

Please enclosed find 10 cents for postage due you on gooseberries. We received our trees and were well pleased with them.

Yours truly,
L. H. Henry, Oklahoma.

Wichita Nurseries,
Wichita, Kansas.
Gentlemen:

Am enclosing 8 cents in stamps due you for extra postage on the Spirea sent me. We are thoroughly pleased with the plants. Several have asked us about them and we have given your address to those inquiring. Thank you kindly.

Yours truly,
R. E. Crabbs, Kansas.

Wichita Nurseries,
Wichita, Kansas.
Gentlemen:

The trees and vines I got from you in the spring have done wonderfully.

Yours truly,
Mrs. Chas. Barrows, Oklahoma.

We are anxious to see that you succeed and appreciate hearing from you.

Special Premium List

To My Many Friends and Customers:

We are pleased to offer this BIG premium list for your approval. We know that you need some of these useful articles and we have created this new idea because we want to give our customers the very best buys and the very best of treatment.

You will note that we are offering four big lists of premiums. The **Family List** gives you the premiums in high grade nursery stock and we think that a number of our patrons will want these premiums. Then we have the **Children's List** and these articles herein described are all fine and made by the best manufacturers in this country. You boys and girls better get busy and help yourselves to these fine premiums. Thirdly, we have the **Men's List**, offering a fine lot of garden tools, garden equipment, sprays, and other valuable materials. We guarantee the quality of these articles and know they will please you. Last, but not least, we offer for the **Ladies** the genuine Tudor 25-year guarantee silverware. These high grade knives, spoons and forks will give you good service and they are nice looking.

We wish to thank you for your consideration of this premium list, our new effort, and we trust that you will take advantage of these fine offers. This is only another way that we have of showing you that we appreciate your business and further, that we are actually taking you in on the profits. We know that the offering of these costly premiums will cut down our profits but if we can make more friends and create more good will we will be amply repaid.

Gratefully yours,

W. F. SCHELL, President.

FACTS ABOUT THIS PREMIUM LIST

READ CAREFULLY—

1—Customers are only entitled to receive one premium, according to the size of your order. For example, if you take a nursery stock premium from the family list, you are not entitled to any other premiums from the other lists. These four lists are submitted to give our customer a greater choice.

2—The amount of your purchase applies only to NURSERY STOCK. Seed purchases do not count in on these free premiums.

3—All premiums are packed and delivered free of charge to the transportation companies but the customer must pay transportation charges.

4—We have a large stock of all these premiums but, in case that the stock of one item is exhausted, then we reserve the right to have you make a second choice.

5—We guarantee that every item listed here is exactly as represented and first class in material and workmanship.

6—All premiums will be forwarded to you as soon as possible after your order has been received.

7—Customers kindly designate how they wish their premiums shipped. You will find a place for this on the order blank in the premium section.

8—Here is an excellent chance for several people to go together and club your orders and get a real nice premium.

9—Nursery stock premiums will be shipped from Wichita, Kansas, and all other premiums from Kansas City, Mo. Since all of these premiums are of light weight, the transportation charges will be small.

HOW TO USE THIS PREMIUM LIST

Every premium is numbered, having a class number and an individual number. For example, if you send us an order for over \$15.00 in nursery stock, and you want the 12 Tudor Teaspoons in the Ladies' List, your number would be "16a." You write this "16a" on the bottom of the front page of the order sheet and give a short description if you wish. If your boy or girl wants the Cannon Ball Play Boy Pedal Car, your number would be "11," there being no individual number in this group. We trust that this brief explanation is clear, if not, write us a letter and we will gladly answer questions.

FAMILY LIST

No. 1—Nursery Stock orders of \$10.00 or over and less than \$15.00 are entitled to receive any one of the following groups of plants:

- (1) 10 New Strain Concord Grapes.

Retail value of each of these groups, \$12.00.

No. 28—Nursery Stock orders of \$100.00 or over receive a straight cash discount of ten per cent.

Hardy Perennial Plants

These are the most beautiful of flowering plants. The roots of these plants live over from season to season and give forth stems that produce the best blooms in the plant kingdom. The following list of species are all adapted to this section of the country. Perennials should be found on all home grounds to add the necessary color to the landscape. Our plants are strong, extra well rooted specimens.

Aquilegia

Digitalis

Rudbeckia

Lily-of-the-Valley

Coreopsis

Gaillardia

Hollyhocks

Delphinium

	Each	10
Achillea Ptarmica (The Pearl).—Pure white flowers, double. Blooms all summer. Fine for cutting.	\$.25	\$2.00
Asters, Hardy (Michaelmas Daisies).—Showiest of our late-flowering plants, giving a wealth of bloom during September and October, a season when most other hardy flowers are past. Plant in masses for best effect. Mixed colors.30	2.50
Aquilegia (Columbine).—One of the most elegant and beautiful of hardy plants producing their graceful and spurred flowers on stems rising two feet or more above the beautifully divided foliage.35	3.00
Boltonia Asteroides .—Bushy plants; five feet high with aster-like flowers; profusely covering the entire plant during the late fall.25	2.00
Bleeding Heart .—An old-fashioned favorite. Its arching stems bear drooping heart-shaped flowers of white and old rose. It is perfectly at home in any part of the hardy border, and especially valuable for planting in the shade.75	7.00
Chrysanthemums .—One of the best of border plants coming in with a grand display of color and cut flowers when other plants are on the wane. We can supply these in red, white, pink, yellow, and all colors mixed.30	2.50
Coreopsis Lanceolata .—A very showy summer-blooming plant with masses of flowers like golden Marguerites. Splendid for cutting.25	2.00
Digitalis (Foxglove).—Old-fashioned, dignified and stately; are wholesome company in any garden and dominate the whole garden when in flower.30	2.75
English Sweet Violets25	2.00
Funkia Subcordata (White Day Lily).—White flowers, 4 to 6 inches long, borne in large clusters.30	2.75
Gaillardia (Blanket Flower).—One of the showiest hardy plants, growing about two feet high. The large flowers are of gorgeous coloring, center dark red-brown, while the petals are marked with rings of brilliant crimson, orange and vermillion.25	2.25
Rudbeckia (Golden Glow).—Fine, double golden-yellow; blooms summer and fall.30	2.75
Gypsophila (Baby's Breath).—A beautiful old-fashioned plant, possessing a grace not found in any other perennial. When in bloom during July and August it forms a symmetrical mass 2 to 3 feet in height, and as much through, of minute pure white flowers, forming a beautiful gauze-like appearance. When cut it is exquisite in combination with other flowers.30	2.50
Hollyhocks .—We have a popular list of these flowers grown in pots and will bloom this year. Double varieties in maroon, red, white and yellow. Also in the beautiful shade of Newport Pink.25	2.25
Iris (Fleur-de-lis or the Poor Man's Orchid).—These beautiful Irises bloom in the spring when the other bulbs have just finished blooming, and because of their great variety of colors make a magnificent show and are perfectly hardy. No home garden is complete without a few clumps scattered about.		
Iris (Royal Purple).—Deep purple.		
Iris (Sans Souci).—Yellowish-bronze, beautifully marked.		
Iris (Lady Frances).—Light blue.		
Iris (Silver King).—Silvery-white.		
Prices, above Irises20	1.75
Iris (Japanese).25	2.00
Lily of the Valley .—The popular little spring flower, for shady places.30	2.50

DELPHINIUM—Larkspur

D. Belladonna .—Free bloomer, June to frost. Flowers turquoise-blue. A fine summer cut-flower plant.		
D. Bellamosum .—The dark blue form of the popular light blue Belladonna with which it is identical in habit of growth, freedom of bloom, but with intensely rich, deep blue flowers.		
D. Gold Medal Hybrids .—A fine strain of mixed hybrids from England. Very fine.		
Prices above varieties30	2.50

HARDY PERENNIAL PLANTS—Continued

Hibiscus

Shasta Daisy

Hibiscus (Mallow).—Mallow Marvels, a robust type of upright habit, producing an abundance of flowers of enormous size in all the richest shades.

Lathyrus Latifolius.—These everlasting Peas are but little known in this country, but are great favorites in England. They are extremely showy and fine. Charming climbers for covering trellises, arbors, etc.

Phlox Decussata (Hardy Phlox).—Perennial phloxes succeed in almost any soil, enriched with manure in spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in autumn.

Phlox (Von Lassburg).—White.

Phlox (R. P. Struthers).—Rose-carmine, with claret-red eye.

Phlox (Royal Purple).—Deep rich purple.

Phlox (Pantheon).—Clear pink, dark eye.

Phlox (Mrs. Jenkins).—Pure white.

Phlox (Champs Elysees).—Fine, rich crimson.

Phlox, hardy (mixed colors).

Phlox, named varieties.

Dianthus (Hardy Grass Pinks).—Old favorite, bearing their sweet clove-scented flowers in the greatest profusion during May and June. They are indispensable for the edge of a hardy border and for cutting. One foot high.

Platycodon (Balloon Flower).—Large, showy, deep blue flowers, good for the rock garden and border.

Papaver (Oriental Poppy).—Tremendous scarlet, cup-shaped, blooms of brightest crimson-scarlet with large purplish-black blotches at base of petals. Clumps of these throughout the border give a brilliancy that no other flower can provide.

Sedum (Stone Crop) (Rose Live-forever).—One of the best rock plants suitable in the border, etc. Pink blossoms and light green foliage.

Shasta Daisy (Burbank's).—Blooms 4 to 6 inches across; white.

Dianthus Barbatus (Sweet William).—A well-known perennial producing great masses of bloom of extremely rich and varied colors. The flowers are lasting and fine for cutting.

Tritoma (Red-Hot Poker).—Flame Flower; Torch Lily. Blooms from July to October, with spikes 3 to 4 feet high and heads of blooms of rich orange-scarlet, producing a grand effect either planted singly in the border or in masses. Hardy if given protection, but the most satisfactory method is to bury the roots in sand in a cool cellar.

Yucca Filamentosa (Adam's Needle).—Very conspicuous plant. The flower stalks 3 to 4 feet high, are covered with large whitish bell-shaped flowers. .

Asparagus

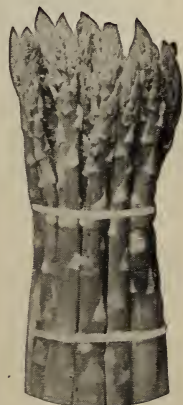

Columbian Mammoth White.—It produces shoots which are white and remain so as long as fit for use. In addition to the marvelous advantage of its white color, the Columbian Mammoth White Asparagus is even more robust and vigorous in habit, and throws larger shoots and fully as many of them as the Conover's Colossal.

Conover.—A mammoth variety of vigorous growth; an old and well-tried sort; very popular.

Palmetto.—Of Southern origin. It is earlier, a better yielder, more even and regular in its growth, and in quality equal to that old favorite, Conover's Colossal.

Rhubarb or Pie Plant

Linnaeus.—Large, early, tender and fine; the very best of all.

Asparagus

FRAGRANT PEONIES

Note.—We sell only the first grade peony roots which are large in size, and which have from 3 to 5 eyes. We have by means of careful selection produced peonies that will bloom and satisfy.

GORGEOUS DAHLIAS

The most beautiful flowers of late summer. The Dahlia bloom holds a high rank for form and color. It is one of the true rivals of the rose. We suggest the named varieties of the Dahlias for then you are assured of numerous blooms of exquisite color and form. Plant tubers three inches deep in moderately rich soil. If growing season is dry, water once a week. If many shoots start up, thin out to two or three shoots. Cultivate the soil well until the plants commence blooming.

Our stock is all field-grown roots and have from one to two eyes to the tuber. These tubers are of good size and will please you. Dahlias multiply freely and this fact should induce our customers to buy only the best.

We offer the following named varieties which are acclimated to this section:

	Each	Per Doz.
1—Crimson Beauty.—Fine crimson.....	\$.25	\$2.50
2—Dark Beauty.—Excellent dark red.....	.30	3.00

BEAUTIFUL GLADIOLUS

These bulbs produce the brightest colored flowers of the summer. Plant the bulb about two inches deep in moderately rich soil. The application of well-rotted manure to the soil during the growing and blooming periods is advisable. If the early summer is dry, water the plants at intervals of once a week. Gladioli are much used for supplying cut flowers for the table and other occasions during the summer months. Gladioli multiply rapidly and these new bulbs will increase volume of your cut flowers each year.

We offer the following named varieties which we have tried and tested in this locality. Every amateur flower gardener should have some of these in his flower garden.

CANNAS

These beautiful flowering plants are the easiest to grow of all home flowers. Most people think of cannas as the common small flowering plants that grew years ago. Only those people that have tried the new named sorts know how beautiful these plants have become. We are introducing this year some real new varieties that will surely please you. They are the very best on the market. The new varieties are marked with the star.

FELIX CROUSE
FESTIVA MAXIMA
PEONIES

WAR, CHICAGO WHITE AND
SCHWABEN GLADIOLUS

GOLDEN GATE DAHLIA

Spring Planting Bulbs

Gladiolus are most desirable of summer flowers for cutting; they are exceedingly beautiful. We recommend Dahlias to anyone wanting attractive bedding plants and fine cut flowers. Cannas, with their flaming flowers and noble foliage, are wonderful bedding plants. Peonies are universal favorites; most magnificent and easy to grow.

Schell's Roses

There is nothing in flowers that takes the place of Roses. There is nothing in flowers that can compare with them in beauty, grace, and ornamentation. It is surely the Queen of Flowers. There is no other flower that is quite as appropriate for decoration.

Roses

Roses Ever Blooming—Roses Ever Beautiful Our Sturdy Field-Grown Roses Will Please You

We feel free to say that our roses this year will please our most fastidious customers. They are all grafted to variety, and have good strong roots and a well balanced top. They are guaranteed free from disease and in good healthy condition. We solicit trial orders to patrons that contemplate rose gardens, rose hedges, specimen planting or trellis plantings.

ROSE CULTURE

Arrival of Roses.—Cut the bundle and place roots in water for a few minutes, then bury the plants deep in the soil until ready for planting.

Planting.—Select a site for the rose garden which has access to plenty of sun. The location should also be well drained as roses do not do well in soggy-wet or cold soils. Design your bed and mark lines on the soil. Remove about two feet of the soil, then fill the trench with mixture of good rich soil mixed with well-rotted barnyard manure. Real fresh manure should not be used as it may burn up the roots of the roses. Plant the roses deep and see that the soil is pressed firmly around the roots. Water the plants well at the time of setting and keep the bed fairly moist in case of lack of rainfall. Mulch the bed with well-rotted barnyard manure at the time of setting or shortly thereafter. Weak manure water and soap suds are excellent fertilizers.

Pruning.—Hybrid Perpetuals should be trimmed at the planting time by removing all branches that extend beyond six to eight inches from the crown. Hybrid Teas are trimmed only slightly so that they have about six inches of the stem above the crown. Climbers should be trimmed very little as the bloom comes on the wood made the year previous. Suckers from the wild-rose stock should be cut off at once. Bush roses should be trimmed severely each March as this trimming will give larger and better blooms and the bush will grow more sightly.

Cultivation.—Spade under the mulch two or three times a year. Have bed well mulched during the dry season.

Spacing.—Hybrid Teas and Everblooms are set from 13 inches to two feet apart. Hybrid Perpetuals are set from two feet to 30 inches apart.

Designing.—Roses always look best in some design or hedges. Rose beds may be in straight lines, oval, circular or in irregular curves. **Selection of Plants.**—Plant only the best stock and from reliable nurseries. Select 2-year-old budded roses. Do not buy cheap greenhouse roses as they are weaklings and cannot give you satisfaction.

GROUP A—BUSH ROSES

TWO-YEAR NO. 1 ROSES

Each 60c; 6 for \$3.30; 12 for \$6.00; 100 for \$42.00.

- 1—**Frau Karl Druschki** (HP).—Called the "White American Beauty" and "Snow Queen." Flowers and buds of large waxy, paper white. Blooms intermittently through the season from June to frost.
 - 2—**K. A. Victoria** (HT).—Elegant rose, large pointed double buds. Color is delicate creamy white. A very productive everbloomer.
 - 3—**G. A. Teplitz** (HT).—Bloom of velvety dark crimson. Blooms abundant and spreading over the entire season. One of the very best of the red garden roses.
 - 4—**Ulrich Bruner** (HP).—A fine outdoor rose with vigorous growth and a fine display of cherry-red blossoms. One of outstanding red roses.
 - 5—**Pink LaFrance** (HT).—Delicate silvery rose, shaded with cerise-pink with pink shading. Blooms all summer.
 - 6—**Paul Neyron** (HP).—A very hardy garden rose. Color of bloom bright ruddy pink. A very dependable all-season bloomer.
 - 7—**Sol de Orr** (HT).—A fine bedding rose. Especially valuable because of its rare color of gold and orange-yellow. Very hardy and a good bloomer.
 - 8—**Sunburst** (HT).—Very fine, with long spiral buds. A lovely bronzy-yellow fading to apricot. Splendid for a garden rose.
 - 9—**Helen Gould** (HT).—In color a very soft intense carmine shade with crimson in the depths of the petals. A fine everblooming rose.
 - 10—**Mamman Cochet Pink** (HT).—Bloom of pale pink color, very dainty and exquisite. Petals curved at tips. Productive of bloom and one of the favorite Hybrid Tea Roses.
 - 11—**Aaron Ward** (HT).—Buds and flowers very attractive. Color deep golden orange shading to cream. A constant bloomer during the summer.
 - 12—**Richmond** (HT).—Bloom of light crimson. Buds well formed and stems long. Blooms through the season. One of the best red roses.
- Other roses in this group include the **Pink Killarney**, **Luxemburg Moss** (red), **Saler Moss** (yellow), **Chas. Lang**, **Bridesmaid**, **American Beauty**.

Explanation—HT means Hybrid Tea.

HP means Hybrid Perpetuals.

Frau Karl Druschki

GROUP B

TWO-YEAR NO. 1 ROSES

Each 70c; 6 for \$3.80; 12 for \$7.20; 100 for \$55.00.

- 1—**Bessie Brown** (HT).—White flushed with pink.
 - 2—**Etoile de France** (HT).—Velvety garnet-red cup with center vivid cerise. Very fragrant and hardy.
 - 3—**Duchess of Wellington** (HT).—Intense saffron-yellow. A fine strong rose sometimes called the "Orange Killarney."
 - 4—**Lady Alice Stanley** (HT).—Shell shaped petals of deep coral rose outside. Interior delicate flesh. A persistent and free bloomer.
 - 5—**Madam Abel Chatenay** (HT).—A grand bedding rose. Flowers of good size and color of rosy-carmine with shaded salmon.
 - 6—**Prince of Bulgaria** (HT).—Very full cup-shaped flowers; exquisite flesh color shaded with apricot and yellow.
 - 7—**Mrs. Charles Russell** (HT).—One of the choicest new pink roses, similar in design to the American Beauty.
 - 8—**Madam Eduard Herriot** (HT).—New French Perpetiana rose. The color is a mixture of bronze, geranium-red and copper.
 - 9—**Earl of Dufferin** (HP).—Rich maroon with dark and velvety shadings. Flowers large and globe-shaped and very fragrant. Other roses in this class include **Geo. Ahrends** (pink), **Capt. Hayward** (crimson), **Mad. Ravary** (yellow), **Pharisaeer** (salmon), **Meteor** (red), **Anne de Diesbach**, **Clio**, **Baroness Rothschild**, **Gen. Jack**, **Marshall P. Wilder**, **Mrs. J. H. Lang**, **Bridesmaid**, **Perle des Jardins**, the **Bride**.
- Explanation—HT means Hybrid Tea.
HP means Hybrid Perpetuals.

GROUP C

TWO-YEAR NO. 1 ROSES

Each 75c; 6 for \$3.90; 12 for \$7.40; 100 for \$57.00.

- 1—**Columbia** (HT).—A beautiful rose-pink. Blooms all season and is very hardy in dry seasons. A double petaled rose of large size and good form. Stems long and practically thornless.
- 2—**Ophelia** (HT).—One of the newest creations, having exquisite blooms of salmon-flesh and rose color. Has fine perfume. Buds and flowers well formed. Really a charming rose.
- 3—**Hoosier Beauty** (HT).—A large full flower with exquisite buds and long stems. Color glowing crimson. Blooms profusely and intermittently throughout the season.
- 4—**Lady Hillington** (HT).—An everbloomer having a color of deep apricot-yellow varying to orange. Buds are well shaped and numerous.
- 5—**Red Radiance** (HT).—Extra hardy and prolific bloomer. A free bloomer having a color of brilliant crimson. One of our very best red roses for the rose garden.
- 6—**Pink Radiance**.—A large intermittent bloomer. Bloom is deep rose and bud-shaped. One of the very finest of the pink roses.
- 7—**Madam Caroline Testout** (HT).—A hardy garden rose having a color of light salmon-pink edged with silvery-rose. Blooms intermittently through the flowering season.
- 8—**Margaret Dickson** (HT).—A new creation of the old favorite, Margaret Dickson. Blooms pure white and abundant. Buds well formed. One of the very best of our white garden roses.
- 9—**Chateau de Clos Vougeot** (HT).—A deep velvety crimson. A free bloomer and very hardy. Produces exquisite perfume and blooms throughout the season.
- 10—**British Queen** (HT).—A wonderful globular bloom of purest white. Petals massive and reflexed. Blooms freely and very hardy.

GROUP D The Very Latest and the Very Best

Willowmere

All Are Bush Roses

Each \$1.50; 6 for \$8.00; 12 for \$15.00.

We are offering the following new varieties of roses to the trade. These are absolutely the latest roses on the market and especially fine. They are all recommended by the American Rose Association. They are all prize winners at the various rose carnivals and very choice.

Size 2-Year No. 1

- 1—**Earl of Warwick**.—Salmon-pink with vermillion-red shadings.
- 2—**Eldorado**.—Deep yellow with copper-bronze shadings.
- 3—**Mrs. Calvin Coolidge**.—A fine deep golden yellow bud-shaped rose.
- 4—**Mrs. Wemyss Quin**.—Canary-yellow, shaded with crimson-orange.
- 5—**Rayon d'Orr**.—Coppery-orange, streaked with brilliant scarlet bars.
- 6—**Rose Marie**.—A clear rose-pink center, shading to blush-pink on tips of petals.
- 7—**Sensation**.—A deep red rose showing same color throughout. A new red; a new rose.
- 8—**Souvenir de Claudius Pernet**.—An exquisite bud-shaped rose of sunflower-yellow color.
- 9—**Souvenir de Georges Pernet**.—An excellent bloomer of brick-red buds, opening to terra cotta-pink.
- 10—**Templar**.—A new shade of crimson-red that will not shade to blue with age. A very large rose.
- 11—**Willowmere**.—A new bud-shaped rose, introducing a new color in roses—a shrimp pink.
- 12—**Padre**.—Beautiful large rose of copper-scarlet and yellow at the base of the petals.

Supply is Limited

GROUP E—RAMBLER

TWO-YEAR NO. 1 ROSES

Each 60c; 6 for \$3.30; 12 for \$6.00; 100 for \$42.00.

- 1—**Crimson Rambler**.—Well known crimson-clustered climber. Makes a rapid growth each season. Excellent rose where quick growth is required.
- 2—**Dorothy Perkins**.—Pink and white. Magnificent cluster rose of strong variety and climbing habit. A favorite in every garden.
- 3—**Yellow or White Rambler**.—A counterpart of the crimson rambler except the bloom is of a different color. Other roses in this group include *Seven Sisters*, *Mrs. R. Perry*, *Baltimore Belle*, *Marechal Neil*, *Prairie Queen*.

GROUP F—CLIMBING ROSES

TWO-YEAR NO. 1

Each 70c; 6 for \$3.80; 12 for \$7.20; 100 for \$55.00.

- 1—**Flower of Fairfield**.—The everblooming crimson rambler. Blooms throughout the season. Flowers rich crimson and clusters are massive.
- 2—**Climbing Meteor**.—Flowers dark crimson on single stem. Sturdy variety, and full blooming.
- 3—**American Pillar**.—Very attractive climber, flowering abundantly in large compact clusters. Flowers single and brilliant carmine in color. A favorite in many gardens.
- 4—**Climbing American Beauty**.—New climbing form of the American Beauty. Flowers large and on single stem and suitable for cutting. Flowers in abundance in June. A very popular climber.
- 5—**Excelsa**.—A red cluster rose which produces double flowers. The clusters are large and massive. A very fast grower and immune to many diseases that attack most climbing roses.
- 6—**Dr. Van Fleet**.—One of the newest climbers. Flowers are borne on single stems which are quite long. Color delicate flesh-pink. Very fine for cutting and house decoration.
- 7—**Tausendschoen** (Thousand Beauty).—A very hardy cluster climber, having massive blooms of soft pink varying to carmine-rose. Very fast grower and very productive in bloom.

GROUP G—CLIMBING ROSES

TWO-YEAR NO. 1 ROSES

Each 80c; 6 for \$4.20; 12 for \$7.80.

- 1—**Paul's Scarlet Climber**.—A wonderful brilliant scarlet climber, shading to shaded crimson. Blooms for a long period; flowers well formed.
- 2—**Vellchenblau** (Blue Rambler).—Unique novelty and a remarkable blue climber. Flowers large and clusters massive. Foliage glossy green. Should be in every garden.

GROUP H—DWARF POLYANTHA, or BABY RAMBLERS

Price per Each 85c; 6 for \$4.75; 12 for \$8.00.

- 1—**Baby Crimson Rambler** (Mme. Norbert Levavasseur).—Brilliant ruby-red.
- 2—**Baby Tausendschoen** (Louise Welter).—Rose, veined with soft clear pink.
- 3—**Erna Teschendorff**.—Carmine-red.

Excelsa Climbing Rose

GROUP J—RUGOSA AND MISCELLANEOUS ROSES

Price per Each 75c; 6 for \$4.20; 12 for \$7.20.

- 1—**Rugosa Shrub Rose**.—Exceedingly hardy and robust types of roses which are always desirable. Rugosa means "wrinkled," which refers to the rich and distinct foliage of this group. While they bloom almost the entire season they are equally desirable in the fall as the single sweet flowers are followed by large bright red seed pods which are ornamental in any planting.
- 2—**Rosa Setigera**.—Single, deep rose-colored flower.
- 3—**Moss Roses**.—The delicate fragrance, beautiful buds, and perfect hardness make this type very popular. To prune, merely cut back the wood of the previous year together with dead branches.
- 4—**Wichuriana Rose**.—Single white, trailing habit. Fine for ground covering.

Imported Dutch Flowering Bulbs

(For Fall Planting Only)

We are pleased to quote our patrons on the following high grade bulbs. They are the best that Holland can produce and we import them each year. We recommend these bulbs to our patrons knowing that they cannot help but give you satisfaction. To our patrons that have not grown these exquisite flowers, we solicit your trial order.

We are also making a specialty on the named varieties of Paeonies and Iris. These remarkable perennials are easy to grow and produce the richest flowers in the garden. Those interested kindly write us for a list of our tested varieties and our prices on same.

TULIPS

The early flowering tulips add a brightness and a color to the garden at a time when there are no other flowers. They are fine for lining walks and drives. Tulips may be planted in beds or groups or may be grouped with the shrubby plantings. We recommend the Darwin Tulips, as they are very large, brilliantly colored, and last longer than the other sorts

Note—Buy 6 at 12 rates and 50 at 100 rates. Per Doz. 100

A Bed of Darwin Tulips

May Flowering Tulips

Emperor Narcissus

L'Innocence Hyacinths

HYACINTHS

A bed of Hyacinths is one of the choicest bits of flower decoration around the home. The colors are brilliant, and the bloom is delightfully fragrant. Hyacinths may be flowered in the house from January to April. Hyacinths grow in any kind of soil and in most any location on the home grounds. They pay for themselves the first season, but come up every year. Do not fail to order some of these fine bulbs.

We recommend the following varieties:

	Doz.	Per 100
1— King of the Blues .—Large bells of compact form. Color of bloom is a rich dark blue. This is a splendid early sort.	\$2.00	\$15.00
2— King of the Yellows .—Large bright yellow bloom. Very satisfactory in combination. Excellent variety for the garden.	2.00	15.00
3— L'Innocence .—A large white bloom of rare fragrance.	2.00	15.00
4— Bouquet Tendre .—Large double red blooms. Greatly in demand on account of brilliant color and well-shaped bloom.	2.00	15.00
5— Chestnut Flower .—Double light pink bloom of large size. One of the best of the named sorts.	2.00	15.00
6— Lord Balfour .—A large purplish-violet bloom of rich color. Largely planted and a great favorite.	2.00	15.00
7— Grand Blanche .—Blush white blooms of excellent shape. Delightfully fragrant. Fine variety for bedding.	2.00	15.00
8— City of Harlem .—Large yellow bloom. One of the very best bloomers in the hyacinth group.	2.00	15.00
9— Garbali .—Brilliant carmine blooms of extra color and fragrance. Fine in combination. . .	2.00	15.00
10— Hyacinths Mixed .—Our mixture, containing varieties of red, white, pink, variegated and bluish-colored blooms. We recommend this mixture highly.	1.90	14.00
6 at 12 rates; 50 at 100 rates.		

We carry the *Oxalis*, *Ranunculus*, *Scillas*, *Snowdrop*, *Chionodoxa*, *Amaryllis*, *Aconite*, *Anemone*, *Calla Lily*, *Japanese Lily*, and other bulbs, and will be glad to quote these on application.

NARCISSUS

The Narcissus family furnishes us with a most charming selection of spring flowers. Their truly brilliant colors lend contrast to the landscape. They are fine in beds, in woodlands, and in combination with the other bulbs. These bulbs multiply and each year they will yield more bloom than the year before.

	Doz.	Per 100
1— Emperor .—Deep primrose, shading with rich yellow perianth. Large bloom and very fine. .	\$1.25	\$8.00
2— Golden Spur .—Large yellow trumpet jonquil of white and yellow colors. Excellent bloomer and attractive.	1.25	8.00
3— Victoria .—A two-colored variety with yellow trumpet and white creamy perianth. Fine bloom with remarkable color contrasts.	1.25	8.00
4— Paper-White Narcissus .—This is the popular variety that is planted indoors in pebbles and water. Very fragrant, bloom star-shaped, white in color. Our bulbs are first grade and give satisfaction.	1.25	8.00
5— Narcissus Mixture .—Our own mixture, containing yellow and white jonquils and some of the star-shaped narcissus. Fine for bedding. .	1.25	8.00
Note—We sell 6 at 12 rates, 50 at 100 rates.		

MISCELLANEOUS FALL BULBS

Crocus.—These little bulbs produce the first blooms spring. The blooms are very rich in color and design. They mix well with the other bulbs or they may be planted as a border line. They are frequently planted in the lawn proper. In any method of planting they are fine and well worth the money.

	Doz.	Per 100
1— Crocus Mixed .—This is our mixture of the brightest hues of blue, yellow and white.	\$.40	\$2.25
6 at 12 rates; 50 at 100 rates.		
Freesias .—The most beautiful of the Cape Bulbs. Very successful for indoor blooming. The blooms are very fragrant, wax-like and graceful. They produce cut flowers of high quality.		
1— Freesias Mixed .—Our own mixture of high grade bulbs which produce the best white flowers. Three-fourths inch bulbs.	\$1.20	\$8.00
6 at 12 rates; 50 at 100 rates.		

PLANTING INSTRUCTIONS

If bulbs are to be planted in beds then spade up the beds and grade from the center out as this allows for drainage. Water the plants in the spring after they start but do not let the water stand on any part of the bed. Fertilize with well-rotted manures or bone meal if soil is poor. In this section it is not necessary to dig the bulbs up each year and store them, but a light mulching over the bulbs will insure them against hard freezing.

Plant *Anemone* and *Crocus* from one to two inches deep and about six inches apart. Plant *Snowdrops* and *Scillas* from two to three inches deep and about four inches apart. Plant *Jonquils*, *Narcissus* and *Tulips* from three to three and one-half inches deep and about six inches apart. Plant *Hyacinths* four inches deep and about seven inches apart. Plant outdoor *Lilies* five inches deep and about twelve inches apart. If you are planting any of the above bulbs in sand or soil inside, plant just one-half as deep as for outdoor planting.

Plant all of these above bulbs from October to January in the fall and they will bloom the next spring. The *Snowdrops*, *Chionodoxas*, *Scillas* and *Crocus* bloom in March. The *Hyacinths*, *Tulips* and *Narcissus* bloom in April. The late *Tulips*, late *Hyacinths* and late *Narcissus* bloom the first part of May. By planting a variety of these bulbs you may have exquisite flowers the greater part of the three months.

"PEERLESS BRANDS" VEGETABLE SEEDS

Fully Tested Seeds Showing Good Germination

IMPORTANT NOTICE

We guarantee that our seeds are all of fresh stock, that they are clean and of the highest quality that money can buy. Truck growers or gardeners contemplating planting a considerable quantity of acreage are requested to send in their list for special quotations. Do not forget to fertilize your gardens for good results. We list some fertilizers on the back page of this price list that are sure to give you satisfaction.

LEONARD'S SEEDS

We are handling this year, as in former years, the Leonard Seeds, grown by the Leonard Seed Company of Chicago. Any seedsman or gardener knows the high quality of these seeds. The Leonard Seed Company is one of the oldest seed companies in this country and employs the most skilled growers to look after the growing and ripening of their seeds. Their large equipment, numerous warehouses and efficient machinery enable them to produce the highest quality in flower and garden seeds. A trial order with us will convince you as to the quality of these seeds and you will be back next year for more.

CONDITIONS OF SALE

Delivery of Seeds.—We forward all vegetable and flower seeds, all sets and bulbs mentioned in quantities contained in this price list FREE BY PARCEL POST OR MAIL, providing shipments are within the third zone (three hundred mile radius) from Wichita. Shipments going beyond the third zone (three hundred mile radius) will be forwarded at the customer's expense. Shipments in larger weights than mentioned in price list will be forwarded by express or parcel post at the customer's expense.

As to Crops.—We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, plants or bulbs; we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned; but we do guarantee that we will use every effort to send you the best seeds, plants or bulbs procurable of such varieties as you may order.

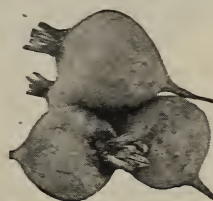

How to Order.—In making out your order, write NAME, POSTOFFICE, COUNTY and STATE and the varieties you want, quantities of each, and carry out the price after each one, enclosing the amount in any convenient form of remittance, to us by mail. Use our Order Blank if you have it.

Terms.—Our terms are strictly cash with the order. We must decline to ship C. O. D.
Select list of Garden Seeds we know are right.

Asparagus and Rhubarb Roots listed on page 27

FRESH VEGETABLES

A great many of our customers live in suburban districts where they cannot have access to the fresh vegetable market. Vegetables must be fresh to be good. The only solution is to grow your own. Deal "Old Man Hi Cost" a killing blow and plant our seeds for fresh vegetables. Practice real economy—have a garden—eat fresh vegetables and reduce your meat diet.

Extra Early Egyptian

BEANS

Beans should be in every garden. Beans should be planted at intervals throughout the growing season. You can have one crop growing while you harvest the previous one. We recommend the Golden Wax, Black Wax, Red Valentine, Long Yellow Six Weeks, Burpee's Stringless Green Pod, Webber Wax and Davis White Wax in the bush bean class. In the pole beans we recommend the Kentucky Wonder, Cutshort, and Lazy Wife for good production.

Green-Podded Bush Beans

*Burpee's Stringless Green-Pod.—33 days. Pkt. 10c; ½ lb. 20c; 1 lb. 30c; 5 lbs. \$1.25; postpaid.
*Extra Red Valentine.—35 days. Pkt. 10c; ½ lb. 15c; 1 lb. 26c; 5 lbs. \$1.20; postpaid.
Early Six Weeks.—Pkt. 10c; ½ lb. 20c; 1 lb. 30c; 5 lbs. \$1.25; postpaid.

Yellow-Pod Bush Beans

*Improved Golden Wax.—32 days. Pkt. 10c; ½ lb. 15c; 1 lb. 26c; 5 lbs. \$1.20; postpaid.
*Wardwell's Kidney Wax.—35 days. Pkt. 10c; ½ lb. 20c; 1 lb. 35c; 5 lbs. \$1.50; postpaid.
Mexican Pinto.—Pkt. 10c; ½ lb. 15c; 1 lb. 25c; 5 lbs. 90c; postpaid.
*Black Wax.—Pkt. 10c; ½ lb. 15c; 1 lb. 26c; 5 lbs. \$1.20; postpaid.

CRESS

Pkt. 10c; 1 oz. 15c; ¼ lb. 40c; postpaid.

SWEET CORN

Sweet Corn is one of the easiest of garden crops to grow. It is quick to mature and gardeners should plant at least two crops each year. One can be planted in early spring and the other in early summer. Market gardeners inform us that they make more on their second crop than on the first crop. Our corn seed is fully tested and fresh each year. Gardeners wanting a large number of pounds should write us for quotations.

CORN—Sugar Corn

Golden Bantam

Golden Bantam.—75 days. Dwarf, 4½ feet. Pkt. 5c; ½ lb. 12c; 1 lb. 20c; 5 lbs. 90c; 10 lbs. \$1.75; postpaid.

PARSLEY

Champion Moss Curled.—Pkt. 10c; 1 oz. 15c; ¼ lb. 40c; 1 lb. \$1.00; postpaid.

PEAS THAT PLEASE

Peas are one of the best of garden crops. They are easy to grow and are highly valued as a meat substitute. By the right cultural methods the plants can be made to produce abundantly. Our pea seed is grown in Wisconsin and the seed is selected from the plants that bear the maximum crops. We have the small bush peas, the medium height ones, and the vine peas. They are all fine and will repay all your earnest efforts.

GARDEN PEAS

Dwarf Bush Sorts

*American Wonder.—62 days. Dwarf bush; about 12 inches. Pkt. 10c; ½ lb. 15c; 1 lb. 30c; 5 lbs. \$1.35; postpaid.

REAL RADISHES

A nice, crisp, tender radish—don't that sound good to you? They will appeal to your appetite and will give you the food roughage that you need to help your digestion. Plant radishes early and then some more in 15 days and so on during the summer. In late summer plant your winter radishes for they will please the most fastidious in early fall. Do not be without a stock of radishes at all times. Drop us a line and we will ship at any time.

RADISH

Long Scarlet.—35 days. Pkt. 5c; 1 oz. 10c; ¼ lb. 20c; 1 lb. 70c; postpaid.
